CHAPTER ONE

FUTURE LAND USE ELEMENT

THIS PAGE LEFT BLANK INTENTIONALLY

Chapter One

Future Land Use Element

GOAL 1: TO ENSURE THAT THE CHARACTER, MAGNITUDE, AND LOCATION OF LAND USES, PROVIDES A SYSTEM FOR ORDERLY GROWTH AND DEVELOPMENT THAT ACHIEVES A BALANCED NATURAL, PHYSICAL, AND ECONOMIC ENVIRONMENT, AND ENHANCES THE QUALITY OF LIFE OF ALL RESIDENTS.

OBJECTIVE 1.1: The Town shall continue to prepare, adopt, implement and enforce land development regulations which effectively guide and manage future growth.

Policy 1.1.1: The Land Development Regulations will regulate: all land uses shown on the Future Land Use Map, the subdivision of land, the location, size and the height of signage, impacts from commercial lighting, architectural standards and areas subject to seasonal or periodic flooding.

Policy 1.1.2: The Land Development Regulations shall provide for drainage and stormwater management and protect potable water well fields and aquifer recharge areas.

Policy 1.1.3: The Land Development Regulations shall ensure that properly designed and safe ingress/egress is available to all sites, and that on-site traffic flow and parking shall be adequate to meet annual maximum daily requirements.

Policy 1.1.4: The Land Development Regulations shall ensure and provide that development orders shall be issued only upon certification that transportation facilities, water, sewerage, and solid waste, and other required services are available to serve proposed development at the adopted level of service, or are committed to be available concurrent with a development's completion.

Policy 1.1.5: The Town shall establish, adopt and implement density and intensity standards for all future land uses indicated on the Future Land Use Element map as follows:

- a) Single family residential use categories shall have a maximum density of one (1) dwelling unit per acre; permitted uses shall include site built homes, schools, and manufactured homes in accordance with zoning regulations; prohibited uses shall include manufactured homes and schools in a Coastal High Hazard Area.
- b) Multi-family residential use categories shall have a maximum density of five (5) units per acre;
- c) Mobile home parks shall have a maximum density of five (5) units per acre;
- d) High density residential use categories shall have a maximum density of twelve (12) units per acre;
- e) Commercial uses shall have a maximum floor area ratio of 0.23 and maximum total impervious surface ratio of 0.25. Permitted uses shall include general commercial and retail uses such as professional offices, retail stores, shopping centers, auto sales and auto service establishments, restaurants, grocery and specialty stores, and the like;
- f) Highway Commercial uses shall have a maximum floor area ratio of 0.60 and maximum total impervious surface ratio of 0.70. Permitted uses shall include general commercial and retail uses oriented toward higher intensities such as professional offices, retail stores, shopping centers, auto sales and auto service establishments, restaurants, grocery and specialty stores, and the like;
- g) Industrial uses shall have a maximum floor area ratio of 0.23 and maximum total impervious surface ratio of 0.25. Permitted uses shall include light industrial uses such as the assembly, packaging and processing of previously prepared goods and materials; the storage of goods and materials (warehousing); the receiving, sorting and/or distribution of goods and materials; fabricating shops; retail and wholesale activities requiring extensive storage or warehousing; related commercial and service activities; and, manufacturing and the processing of raw materials;

- h) Planned Industrial uses shall have a maximum floor area ratio of 0.60 and maximum total impervious surface ratio of 0.70. Permitted uses shall include light industrial uses such as the assembly, packaging and processing of previously prepared goods and materials; the storage of goods and materials (warehousing); the receiving, sorting and/or distribution of goods and materials; fabricating shops; retail and wholesale activities requiring extensive storage or warehousing; related commercial and service activities; and, manufacturing and the processing of raw materials. This land use district is intended to allow for the development of planned industrial parks or industrial uses with dedicated open space buffers. New development in this land use category shall be designed with a focus on energy efficient principles. For the purposes of this policy, "energy efficient principles" refers to coordinated development strategies to reduce energy consumption and greenhouse gas emission. Implementation of energy reduction strategies shall include, but not be limited to: Energy-efficient appliances; Energy-efficient windows, doors, and skylights; Low solar-absorption roofs, also known as "cool roofs"; Enhanced ceiling and wall insulation; Reduced-leak duct systems; Programmable thermostats; and Energy-efficient lighting systems.
- i) Mixed Use – This land use category will be implemented by one or more mixed use zoning districts. Implementation of this district will require a concurrent application for approval of Mixed Use zoning. The zoning district(s) will be limited to a minimum tract size. A minimum open space and buffering requirement will also be clarified. Density and intensity limits for projects within this category will not exceed those adopted for the Highway Commercial and Multi-family Residential, land use categories. Development approval shall be limited to the contents of a site specific Development Plan approved by the Town Commission. Said Development Plan shall include a land use distribution table suitable for site impact assessment
- j) The density and intensity of the above land use categories shall be further limited by the need for sanitary sewer (septic) facilities and stormwater facilities which must be licensed by the Florida Department of Health and Rehabilitative Services the Florida Department of Environmental Protection or the Southwest Florida Water Management District.
- k) Educational/public buildings & grounds/other public facilities shall include public administration buildings, public safety and protection facilities, post offices, libraries, educational institutions, churches, cemeteries, highways and roads and the associated rights-of-way of each and similar public and semi-public uses;
- l) Utility uses shall include public utilities and maintenance facilities such as public potable waterwells, water treatment and distribution facilities, sanitary sewer collection, treatment and disposal facilities, electric transmission facilities and the like;
- m) Recreational uses shall include public parks and open space; typical development may include turf, trees, shrubs, irrigation, benches, picnic tables, trash receptacles, play apparatus, recreation buildings, tennis courts, multipurpose courts, sports fields, ball fields and swimming pools;
- n) Conservation use shall be limited to single family dwelling units at a maximum density of one (1) dwelling unit per five (5) acres and public passive recreational or open space uses; and,
- o) Timber uses shall be limited to silvicultural operations, and only structures inherently associated with such use, as limited to the growth of plant material shall be permitted in the timber land use category.

Policy 1.1.6: The Future Land Use Map shall delineate the Coastal High Hazard Area, which is defined as the area below the elevation of the category 1 storm surge line as established by a Sea, Lake, and Overland Surges from Hurricanes computerized storm surge model, as reflected in the most recent regional evacuation study, Storm Tide Atlas.

OBJECTIVE 1.2: The Town Zoning Map shall continue to ensure future development and redevelopment activities are located in appropriate areas of the town as illustrated on the adopted Future Land Use Map; which shall be consistent with sound planning principles, and provides for control of urban sprawl in conformance with directives of the adopted Future Land Use Element.

Policy 1.2.1: The Town shall encourage the use of innovative land use development techniques such as planned development projects, clustering and mixed use.

Policy 1.2.2: Concentrate higher density and intensity growth in and around areas which are adequately served by transportation facilities, public utilities, and community services and facilities.

Policy 1.2.3: Locate future land uses at densities and intensities which will control urban sprawl and leap-frog development that unduly depletes the physical, social, and financial resources of the town.

Policy 1.2.4: Residential subdivisions shall be designed to include an efficient system of internal circulation, including the provision of external collector streets, where applicable, to feed the traffic onto external arterial roads and highways.

Policy 1.2.5: Develop a broad diversity of residential housing types to satisfy the housing preferences and income levels of all residents.

Policy 1.2.6: Protect residential areas from incompatible commercial and industrial uses.

Policy 1.2.7: Require connection to the town's central water system for all developments.

Policy 1.2.8: Discourage isolated residential developments that require higher service costs through proper implementation of policies 1.2.2, 1.2.3, 1.2.5, 1.2.9, 1.2.11, 1.2.13, and other appropriate, adopted policies of this plan.

Policy 1.2.9: Direct urban growth by providing community facilities in prime expansion areas, and withhold these facilities from areas in which growth is to be discouraged.

Policy 1.2.10: Approve the location of new development on the basis of the land's ability to support such uses without adversely affecting the natural environment through use of proper site plan review procedures and appropriate mitigation measures.

Policy 1.2.11: Prior to approval of locating future development, evaluate the impact of development on existing land use, in relation to employment, transportation, and essential services such as water, police and fire protection, and schools.

Policy 1.2.12: Promote development of commercial areas which are convenient to the public, and well integrated into the transportation system, and surrounding land uses.

Policy 1.2.13: Encourage commercial activities to infill and locate near the town center through the use of proper land use principles and appropriate zoning or land use district designations.

Policy 1.2.14: Prohibit commercial activities from locating in wetlands as they are defined by the most comprehensive criteria of one or more of the following agencies: The U.S. Army Corps of Engineers, the Florida Department of Environmental Protection, the Southwest Florida Water Management District; also, the extent of wetlands shall be precisely delimited by an on-site inspection by a wetlands biologist as part of the development review and application process. However for the general planning purposes of this plan, wetland areas are generally depicted on Map I-8.

Policy 1.2.15: Prohibit commercial activities from locating in conservation areas as delineated on the Future Land Use.

Policy 1.2.16: Development within the 100-year floodplains is allowed consistent with proper site plan review procedures and the adopted floodplain management objectives and policies of this plan; in particular, objectives and policies in the Drainage Sub-element and the Conservation Element.

Policy 1.2.17: Concentrate commercial activities and buffer them from residential and open space areas, but require all commercial development to have connecting pedestrian ways when located next to residential or future residential land uses.

Policy 1.2.18: Require adequate off-street parking and loading facilities in all commercial areas.

Policy 1.2.19: The Town shall, through Comprehensive Plan amendment process and application of proper development review procedures, permit industrial development which is compatible with the specific site in question and its existing natural environment.

Policy 1.2.20: Specifically permit the type, intensity, and location of industrial development in such a way as to foster a diversified economic base, while not being detrimental to the Town's aesthetics and the quality of life through appropriate zoning district designation and adherence to proper planning principles.

Policy 1.2.21: Disallow industry from locating in residential areas.

Policy 1.2.22: Permit the clustering of industrial activities in industrial parks located in designated Industrial Nodes, which are accessible to adequate transportation facilities.

Policy 1.2.23: Protect existing industrial areas from encroachment by residential and non-compatible commercial.

Policy 1.2.24: Separate industrial districts from residential and commercial districts through adequate buffering and screening.

Policy 1.2.25: Disapprove industrial rezoning requests for lands which are not compatible with adjacent land

Policy 1.2.26: Disallow industrial activities from locating in wetlands, 100-year flood zones, and delineated conservation areas where adverse natural system impact will occur.

OBJECTIVE 1.3: The Comprehensive Plan shall provide appropriate measures to ensure that all public facilities and services necessary to meet adopted level of service standards are available concurrent with the impacts of the development.

Policy 1.3.1: Building permits shall be issued only upon the condition that a stormwater permit has been issued or exempted by the Southwest Florida Water Management District, and site plans are approved with stormwater management controls that meet the adopted level of service standards.

Policy 1.3.2: A minimum 300 foot zone of protection shall be required for each of the Town's potable water wells and these identified physical boundaries shall be the basis on which the use of hazardous substances shall be restricted, and which certain land uses which in and of themselves have a likelihood to endanger potable water supplies. These substances and/or uses shall be restricted and/or specially regulated for the purpose of protecting potable water supplies.

Policy 1.3.3: All delineated conservation land, seasonal ponds, wetlands and their associated vegetative communities, shall be conserved and protected from the effects of urbanization and development activities through proper site plan review procedure and mitigation measures.

Policy 1.3.4: On-site traffic flow shall be controlled for safety, with appropriate marking and signage while minimizing egress on to arterial roads.

Policy 1.3.5: On-site parking requirements for multi-family and commercial development shall be required to provide adequate parking for conditions of maximum demand.

Policy 1.3.6: The development of residential, commercial and industrial land uses shall be timed and staged in conjunction with provision of supporting community facilities, such as, but not limited to, streets, utilities, potable water, and police and fire protection service.

Policy 1.3.7: The developer/owner of any site shall retain ultimate responsibility for on-site construction, maintenance, and management of offsite stormwater runoff onto adjacent properties, which shall be provided in such a manner that post-development offsite runoff rates, volumes and pollutant loads do not exceed pre-development conditions.

Policy 1.3.8: Utilize Rule of the Department of Transportation Chapter 14-97 of the Florida Administrative Code as a model for access management standards in the Land Development Regulations.

OBJECTIVE 1.4: The Town shall continue to pursue necessary measures to ensure preservation and conservation of known historical resources.

Policy 1.4.1: If Town construction activities reveal a suspected historical or pre-historical archaeological site, the Town shall determine the extent and nature of the site and report such findings to the State of Florida, by a Master Site File application, and mitigate any impacts upon the site if the site is determined to be relatively intensive in cultural remains, or significant to the archaeological or historical record. Such determination of site extent, nature and significance shall be made by a professional archaeologist as recognized by the Florida Department of State, Division of Historical Resources, Bureau of Historic Preservation.

Policy 1.4.2: The Town shall negotiate with land owners prior to the development review process, to avoid disturbance of known historical and pre-historical sites.

OBJECTIVE 1.5: The Town shall continue to implement Housing Element directives for renewal and revitalization of substandard housing within time frames and a scope of assistance as identified within the element.

Policy 1.5.1: The Town shall utilize available governmental programs as appropriate for renewal and revitalization of substandard housing locations as identified in the Housing Element.

OBJECTIVE 1.6: The Town shall provide specific mechanisms which encourage the reduction or elimination of land uses that are inconsistent with the community's character.

Policy 1.6.1: The Town shall, through implementation of the Future Land Use Element, Map Series, Land Development Regulations and Town Zoning Map, reduce or eliminate land uses that are inconsistent with the community's character.

Policy 1.6.2: Public safety issues cited in the Land Development Regulations shall be strongly enforced.

OBJECTIVE 1.7: The Town shall investigate, initiate, and enforce such regulations as are necessary to ensure protection of the Town's natural resources.

Policy 1.7.1: The Town shall through initiation and enforcement of the goals, objectives, and policies of the adopted comprehensive plan and implementation of the Town Land Development Regulations provide protective mechanisms for the Town's natural resources.

OBJECTIVE 1.8: In conformance with concurrency objectives of the adopted comprehensive plan the Town shall ensure that suitable land is available for utility facilities to support proposed development as applicable and necessary.

Policy 1.8.1: The Town shall monitor, evaluate, and provide level of service (LOS) standards as applicable and necessary to ensure that suitable land is available for utility facilities to support proposed development.

OBJECTIVE 1.9: The Land Development Regulations shall contain directives that utilize innovative land development regulations, as appropriate.

Policy 1.9.1: The Land Development Regulations shall provide criteria and standards to accommodate innovative land development techniques such as those identified in Policy 1.2.1 of this element.

OBJECTIVE 1.10: The Town shall utilize to the extent possible recommendations of the Local Mitigation Strategy as applicable to development and redevelopment issues.

Policy 1.10.1: Through continued participation on the County Local Mitigation Strategy Working Group, coordinate future land uses by encouraging the elimination or reduction of uses that are inconsistent with any interagency hazard mitigation report recommendations that the local government determines to be appropriate.

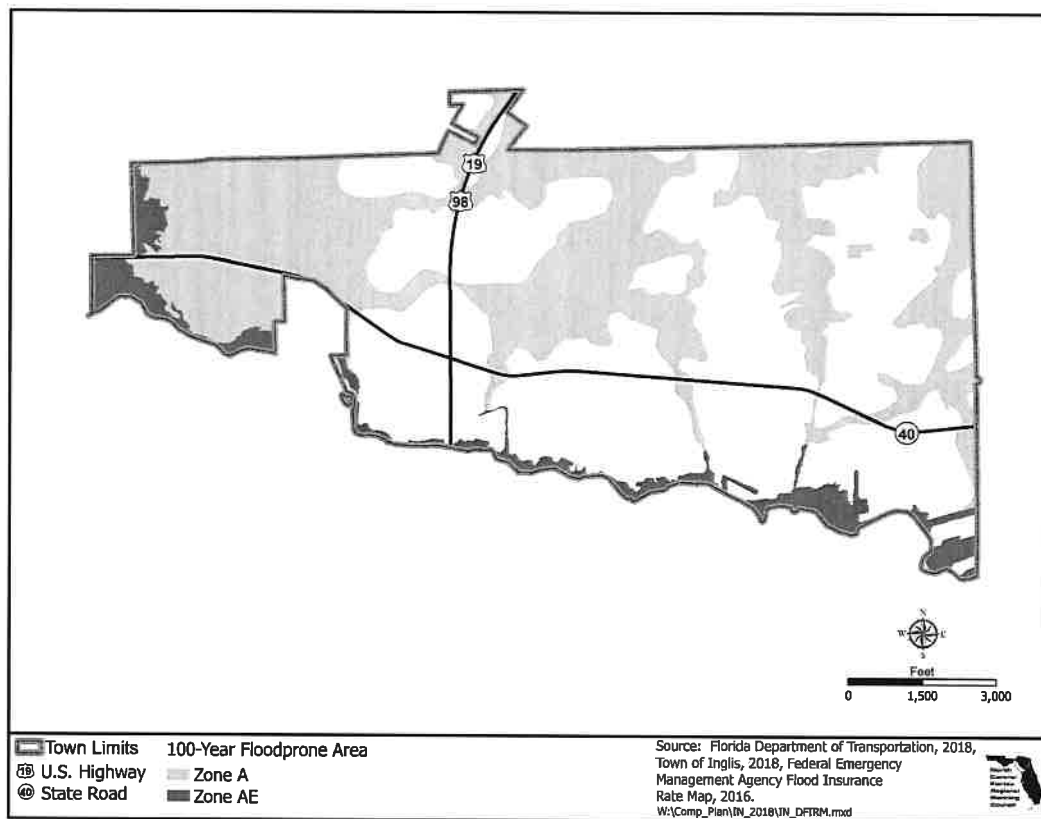

OBJECTIVE 1.11: The Town shall allow electrical substations as a permitted use by right within all land use classifications, except Conservation future land use category and any Historic Preservation Overlay district as depicted on the Future Land Use Plan Map.

Policy 1.11.1: New distribution electric substations should be constructed to achieve compatibility with adjacent and surrounding land uses. The following standards intended to balance the need for electricity with land use compatibility shall apply to new distribution electric substations.

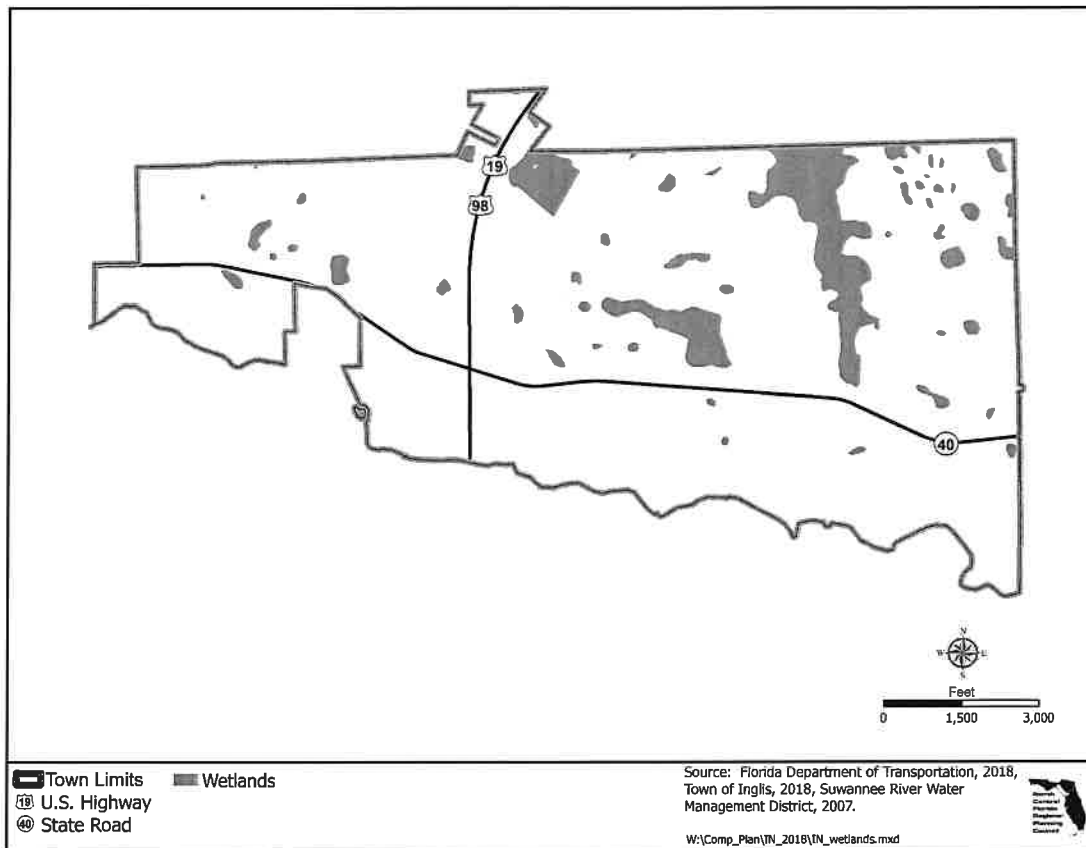

- a) In nonresidential areas abutting residential areas, a setback of 100 feet between the distribution electric substation property boundary and permanent equipment structures shall be maintained. An open green space shall be formed by installing native landscaping, including trees and shrub material. Substation equipment shall be protected by a security fence.
- b) In residential areas, a setback of 100 feet between the distribution electric substation property boundary and permanent equipment structures shall be maintained. An open green space shall be formed by installing native landscaping, including trees and shrub material. Substation equipment shall be protected by a security fence.

CHAPTER TWO

TRANSPORTATION ELEMENT

THIS PAGE LEFT BLANK INTENTIONALLY

Chapter Two

Transportation Element

GOAL 2: TO PROVIDE A SYSTEM FOR BOTH MOTORIZED AND NON-MOTORIZED MODES OF TRANSPORTATION WHICH SERVES TO MAXIMIZE PUBLIC SAFETY, SUPPLY CONVENIENT ACCESS TO DESTINATIONS, IS EFFICIENT IN DESIGN, AND PROMOTES ENERGY CONSERVATION.

OBJECTIVE 2.1: The Town shall coordinate with the County, and the Florida Department of Transportation, to mitigate the projected capacity impacts along roadway segments of state, county, and town owned roadways.

Policy 2.1.1: The Town shall implement a notification process, as part of a development permit application, in order to inform, the Florida Department of Transportation, and the County, when proposed development will result in an increased traffic volume on state or county owned roadways that will reduce the roadway's operating level of service.

Policy 2.1.2: The Town shall coordinate with the Florida Department of Transportation to implement traffic control methods which will improve safety, and limit air and noise pollution, attributable to truck and other motorized vehicle traffic, on state or county owned highways which pass through the Town.

Policy 2.1.3: Through consideration of joint action with the Florida Department of Transportation and the County, the Town will evaluate the benefits of coordinated action in support of transportation demand and system management solutions if as needed or in response to an outside request.

OBJECTIVE 2.2: The Town Planning Commission shall administer a comprehensive program to monitor motorized and non-motorized transportation systems for safety, access, efficiency, energy conservation, and level of service conditions by reporting to the Town Commission whenever of the Planning Commission's meeting agenda items relate to any of these subject topics. The monitoring program may use traffic volume counts and other information compiled by the Florida Department of Transportation and the County.

Policy 2.2.1: The Town does hereby adopt the following peak hour level of service standards for roadways within the Town, as defined within the most recent version of the Florida Department of Transportation Quality/Level of Service Handbook:

1. Principal Arterials- LOS C at Peak Hour
2. Major and Minor Collectors- LOS C at Peak Hour

Policy 2.2.2: The Town shall adopt and implement standards for trip generation estimates to be used in the development plan review process.

Policy 2.2.3: The Town shall review all development proposals, and require that they provide sufficient information, to ascertain that proposed development's impact to the level of service on roadways in the town, and shall issue a development order with the contingency that a certificate of occupancy for that development will be issued only if the impact of that development on the roadway system will maintain the adopted level of service standards.

Policy 2.2.4: The Town shall implement land development regulations which will require all new development to provide and dedicate additional right-of-way for existing road systems, in which the present right-of-way is insufficient for either, projected future needs for infrastructure improvements, public safety objectives, or for maintenance of the adopted level of service for projected future traffic volumes.

Policy 2.2.5: The Town's Land Development Regulations shall include requirements for on-site traffic flow for both motorized and non-motorized vehicles, which will assure safe, convenient, movement of vehicles and pedestrians.

Policy 2.2.6: Where new roadway systems are planned according to the Future Traffic Circulation Map, new development which will abut the planned roadway shall be required to dedicate the right-of-way necessary, where applicable, to maintain the adopted level of service for that roadway.

Policy 2.2.7: All new subdivisions shall have paved roads, and adequate drainage structures that meet the adopted level of service standards.

Policy 2.2.8: Periodically, and as often as needed, the Town Planning Commission will agenda discussion to review the Town's concurrency management system. Topics to be evaluated will include impact fees, adoption of a proportionate fair share ordinance, dedications, exactions, in lieu fees, and special assessments.

Policy 2.2.9: For roads, transit or other enhancements to the multimodal system, the Town's concurrency management system mandates transportation facilities needed to serve new development shall be in place or under actual construction within 3 years after the approval of a building permit or its functional equivalent that results in traffic generation.

Policy 2.2.10: In accordance with Section 163.3180(5)(h)1.c. and 163.3180(5)(h)2. Florida Statutes, as amended, the Town shall provide a means by which the landowner will be assessed a proportionate share of the cost of providing the transportation facilities necessary to serve the proposed development. However, the landowner shall not be held responsible for the additional cost of reducing or eliminating deficient transportation facilities.

OBJECTIVE 2.3: The formal procedures established in the Capital Improvements Element shall prioritize both, needed roadway improvement projects, and identify the revenues to complete these projects in the 5-year schedule of Capital Improvements.

Policy 2.3.1: The Town shall keep records of roadway, pedestrian, and bicycle accident frequency, and use these records to formulate priorities for motorized and non-motorized traffic improvements.

Policy 2.3.2: Data contained in the Census Transportation Planning Package, the Federal Transportation Administration's National Household Travel Survey, The American Community Survey, and other professionally recognized sources shall be used to develop analysis and indicators evaluating the performance of the goals, policies and objectives of the transportation element.

OBJECTIVE 2.4: All decisions and actions the Town initiates or implements, which will have an impact on the traffic circulation system, shall be consistent with the adopted future land use map and future land use goals, objectives and policies of this plan.

Policy 2.4.1: Proposed changes to the traffic circulation system shall be reviewed for the necessity and appropriateness of the proposed change, in relation to future land uses as depicted on the future land use map, and the adopted level of service standards.

OBJECTIVE 2.5: All future roadway system design shall provide features for non-motorized transportation, the purpose of which is to provide access for all citizens, and to maintain ambient air quality within Environmental Protection Agency, and Florida Department of Environmental Protection standards.

Policy 2.5.1: In accordance with Section 163.3202, Florida Statutes, the Town shall implement land development regulations which will require new development to provide and dedicate pedestrian ways.

Policy 2.5.2: The Town shall incorporate sidewalks and paved shoulders (bike lanes) in the design of arterial roadway improvements which will provide citizens with access to shopping, employment, public buildings, and recreational centers.

Policy 2.5.3: The Town shall implement a program to prioritize sidewalk construction and repair as part of annual capital improvements element update.

Policy 2.5.4: All pedestrian ways constructed within the Town shall be designed to be accessible to handicapped persons.

OBJECTIVE 2.6: As part of its multi-modal approach to transportation planning, the Town will participate as a stakeholder in transportation planning initiatives related to transit, especially as related to the transportation disadvantaged population, while implementing policies through its Land Development Regulations that support future expansion of transit service provision.

Policy 2.6.1: To create in the Town a dense regional job center, which serves as an access hub, where energy efficient land use patterns effectively reduce vehicle emissions and miles traveled.

Policy 2.6.2: The Town will investigate the Land Development Regulations to determine what specific revisions could help increase the concentration of jobs, residences and commercial along local functionally classified arterial and collector streets to support future efforts to define possible regional transit corridors.

Policy 2.6.3: As growth occurs, the Town will evaluate how energy efficient land use patterns have created density increase at the block, neighborhood and municipal levels. Land use intensity may also be monitored. Where data exists related to both land use and transportation, it will be applied to identify future opportunities for transit corridor identification.

Policy 2.6.4: The Town shall organize automotive trip generation information gathered through the development approval process to enable future analysis of the relationships between major traffic generators to enable efficient use of roadway capacity.

Policy 2.6.5: Land Development Regulations standards related to public access and traffic flow shall help facilitate the effective provision of demand response transit service. The Town will review its Land Development Regulations to ensure it promotes transit supportive development practices.

Policy 2.6.6: To further multimodal connection within the surface transportation system, the Town assess opportunities to place pedestrian improvements and bikeways within the right-of-way of functionally classified roadways.

OBJECTIVE 2.7: In conformance with Section 163.3202, Florida Statutes, as amended, the Town's adopted Land Development Regulations shall provide implementation measures to preserve and protect right-of-way for capacity expansion and necessary capacity improvements. When needed, the Town may revise its program of corridor management or initiate specific transportation system management practices, as implemented through the Land Development Regulations, as an appropriate response to diminishing surplus roadway capacity.

Policy 2.7.1: In order to assist in the preservation of rights-of-way for capacity expansion, the Town shall implement a land development regulation to provide the necessary structure setback along property frontage that abuts arterial highways, and all other roads in the Town.

Policy 2.7.2: Curb cuts shall be kept to a minimum, and shared by neighboring commercial establishments, where practical, along arterial and collector roadways, to both enhance the safety of roadways, and to maintain the adopted level of service.

Policy 2.7.3: Non-governmental signage and off-site signs shall be prohibited from both existing and future rights-of-way.

Policy 2.7.4: The Town's adopted Land Development Regulations, as required by Section 163.3202, Florida Statutes, as amended, shall require all existing structures that encroach on right-of-way to be considered non-conforming, and those structures shall be under the provisions for non-conforming structures in the Land Development Regulations.

OBJECTIVE 2.8: All roadway improvement projects shall be designed to further develop a safe, accessible, efficient and transportation system. Aesthetic impacts may be addressed through the use of Context Sensitive Design Controls and other methods that help integrate transportation facilities into their surroundings.

Policy 2.8.1: The Town's Land Development Regulations shall require parking lots to be functionally landscaped to -provide maximal shading, beauty (i.e. scale of height, and use of color, shape and texture), and stormwater retention.

Policy 2.8.2: The Town Land Development Regulations shall require that non-governmental signage and off-site signs shall be prohibited from both existing and future rights-of-way.

Policy 2.8.3: At the time of funding allocation for roadway improvements the Town shall pursue funding for aesthetic enhancements.

Policy 2.8.4: In conformance with Section 163.3202, Florida Statutes, the Town Land Development Regulations shall address on-site traffic flow and vehicular parking requirements.

Policy 2.8.5: The Town's Land Development Regulations shall require all new non-residential development to provide off-street parking for both motorized and non-motorized vehicles.

Policy 2.8.6: The Town shall require all new development to provide adequate and safe off-street parking based upon an established density and intensity of permitted land use.

Policy 2.8.7: Utilize corridor overlay zones to manage access along commercial corridors.

Policy 2.8.8: Properties under the same ownership or those consolidated for development shall be treated as one property for the purposes of access management and shall not receive the maximum potential number of access points for that frontage indicated under minimum access spacing standards.

Policy 2.8.9: Shopping centers shall be required to provide a unified access and circulation plan and require any out parcels to obtain access from the unified access and circulation system.

Policy 2.8.10: Existing lots unable to meet the access spacing standards for arterials shall obtain access from platted side streets, parallel streets, service roads, joint and cross-access or the provision of easements.

Policy 2.8.11: Adequate corner clearance shall be maintained at crossroad intersections with arterials.

Policy 2.8.12: The Town shall encourage cross-access connections easements and joint driveways, where available and economically feasible.

Policy 2.8.13: For State Roads, the number and frequency of connections and access points shall be in conformance with Chapter 14-97 and 17-97, Florida Administrative Code.

OBJECTIVE 2.9: Should significant aviation, marine or intermodal transportation facilities develop, the town will help coordinate access to the municipal right-of-way pursuant to the requirements of the Land Development Regulations during the site planning process. To accommodate access and mitigation of transportation impacts outside the municipal street system, the Town will plan for development of public, non-automotive facilities with reference to the relevant state or federal plan documents.

Policy 2.9.1: Development of ports, airports or related facilities shall be in accordance with state and federal regulatory directives.

Policy 2.9.2: The Town may promulgate through the Land Development Regulations all controls necessary to ensure compatible land use adjacent to aviation, marine or intermodal facilities. The Town will coordinate land use controls with other jurisdictions as needed to achieve land use compatibility.

Policy 2.9.3: Development of marine, aviation and intermodal transportation facilities should occur in a manner that is consistent with the requirements of the future land use and conservation elements and the town's land development regulations.

Policy 2.9.4: Revision of the Land Development Regulations should occur as needed to promote effective intermodal management practices; major aviation, marine and intermodal facilities shall be removed from incompatible land uses by adequate local or inter-jurisdictional land use controls.

OBJECTIVE 2.10: Mobility will be achieved and sustained through a multi-modal approach that permits user choice between motorized, non-motorized and pedestrian mode options.

Policy 2.10.1: Promote urban infill development opportunities for sites with frontage on higher-order streets to better create a compact, dense and walkable environment containing different land uses.

Policy 2.10.2: The Town may consider where implementation of transportation systems management strategies, such as traffic calming, could help support a multimodal approach, encouraging pedestrian and bicycle use, and thereby reducing vehicle miles traveled.

Policy 2.10.3: Where connections exist between public streets and multipurpose trails, the Town will pursue enhanced signage which clearly and visibly identifies and promotes the use of pedestrian facilities.

Policy 2.10.4: Municipal investment in infrastructure and additional system capacity to serve existing development or contiguous with such areas shall be prioritized during annual update of the Town's 5-year schedule of capital improvements.

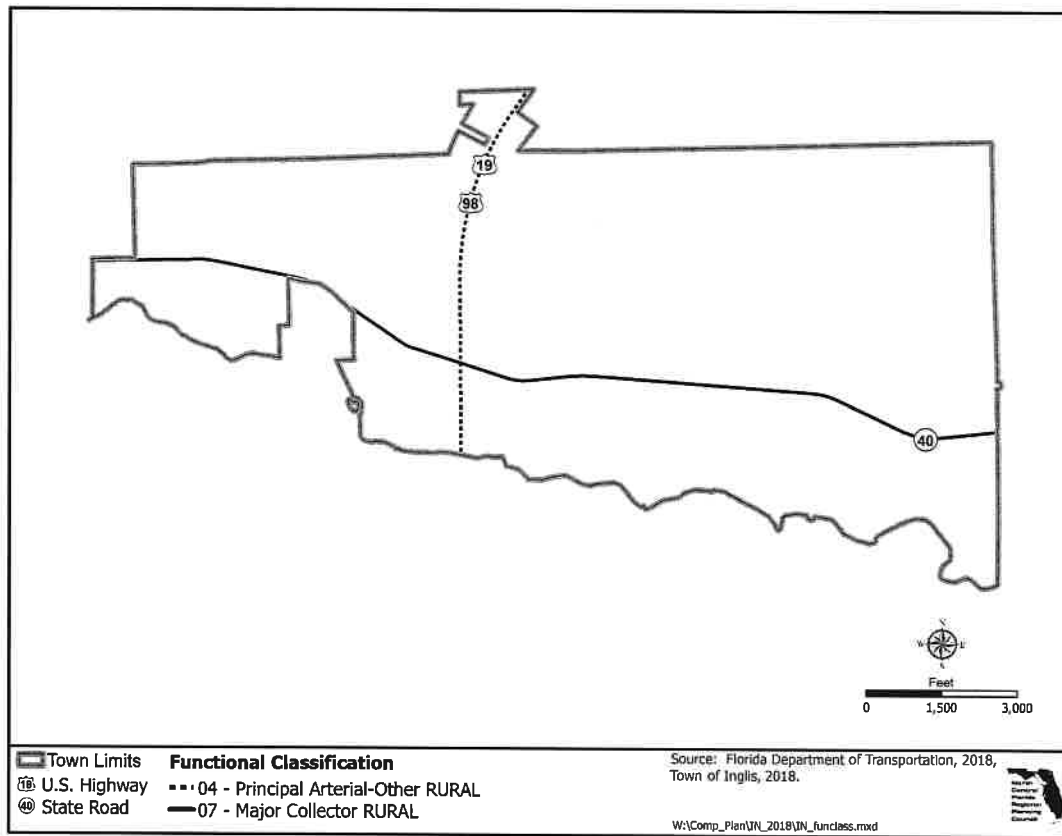

Policy 2.10.5: The Town will utilize existing land development regulations to achieve permitted intensity of land use, while limiting the amount of impervious surface area created through strategies like shared parking and access arrangements that flexibly allow compliance to requirements.

Policy 2.10.6: Development of the Town surface transportation system should provide sufficient access to local goods and services as a means to reduce total vehicle miles traveled.

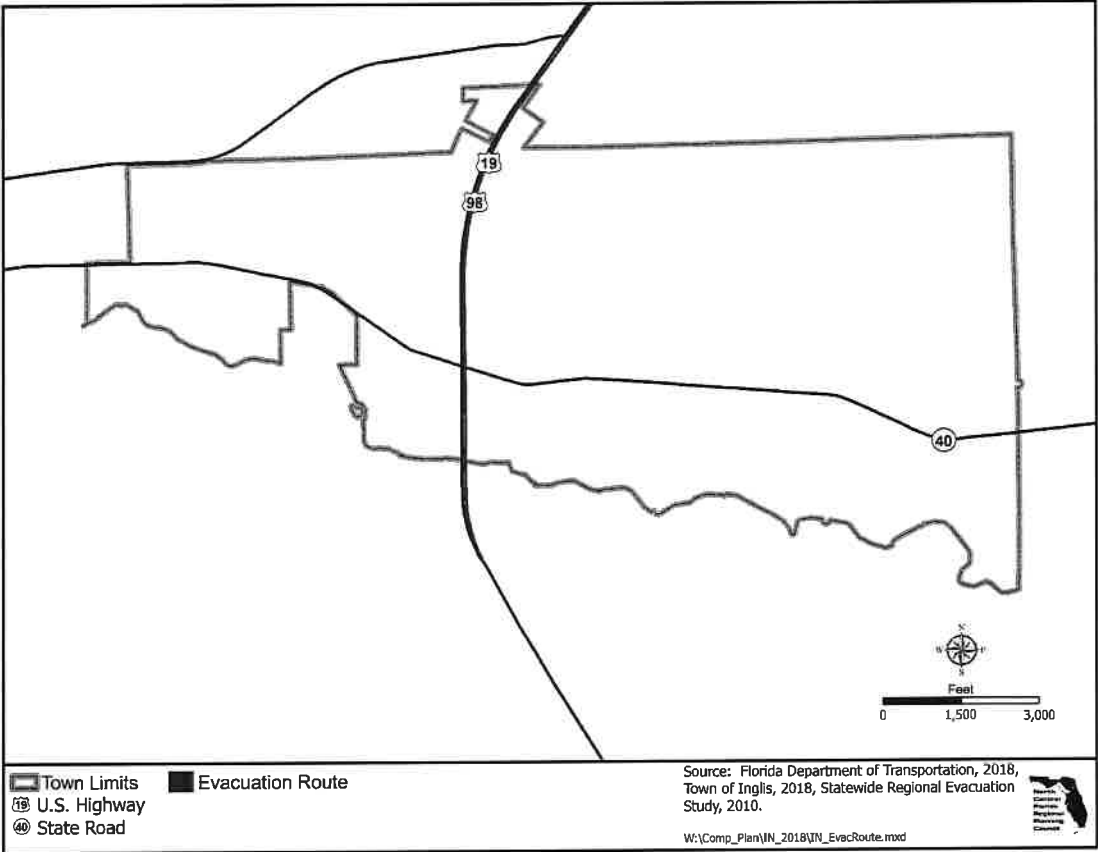

Policy 2.10.7: As municipal revenues permit, the Town will explore opportunities to plan for pedestrian and bicycle way improvements or to implement feasible improvement projects through update of the 5-year schedule of capital improvements.

Policy 2.10.8: The Town shall support the preparation of a bicycle pedestrian master plan to best serve the needs of the community.

HOUSING ELEMENT

THIS PAGE LEFT BLANK INTENTIONALLY

Chapter Three

Housing Element

GOAL 3: TO ENCOURAGE AND PROMOTE THE AVAILABILITY OF AFFORDABLE, DECENT, SAFE AND SANITARY HOUSING TO MEET THE NEEDS OF THE PRESENT AND FUTURE POPULATION OF THE TOWN.

OBJECTIVE 3.1: Plan for provision of new dwelling units of various types, sizes and costs to meet the needs of the existing and anticipated population of the Town through adoption and implementation of all the following objectives and policies identified within this element.

Policy 3.1.1: Provide information, technical assistance, and clear development guidelines to the private and non-profit sector to maintain a sufficient housing production capacity.

Policy 3.1.2: Develop local government partnerships with the private sector to improve the efficiency, affordability, availability, and supply of safe and sanitary housing within the town, placing proper emphasis on the needs of the extremely-low, very-low, low and moderate income families and those of the elderly.

Policy 3.1.3: Provide clear and concise ordinances, codes, regulations and permitting process for the purpose of eliminating excessive requirements in order to increase private sector participation in meeting the housing needs.

Policy 3.1.4: Ensure the availability of sites for special need residents such as the elderly, handicapped, and institutionalized, which shall consider accessibility, convenience and infrastructure availability.

OBJECTIVE 2: By the year 2029, the housing units presently identified as substandard and abandoned shall be renovated or eliminated.

Policy 3.2.1: Code enforcement activities shall be increased in neighborhoods where code violations are prevalent to ensure violations are corrected in a timely manner as provided by the Town Code.

Policy 3.2.2: Seek federal and state funding for the rehabilitation and/or demolition of identified substandard housing.

Policy 3.2.3: Concentrate code enforcement or assistance in those areas of the town where blight type conditions may occur by providing capital improvements and/or operating budget improvements in such neighborhoods.

Policy 3.2.4: Encourage and permit the use of Planned Unit Developments and other innovative reuses of the existing housing stock which will result in the removal of substandard housing units.

OBJECTIVE 3: Continue to promote open occupancy and fair housing practices in the Town.

Policy 3.3.1: Continue to provide assistance to the County Housing Authority and other appropriate agencies to determine and develop sites and programs for housing for extremely-low, very-low, low and moderate income persons.

Policy 3.3.2: Continue to endorse the federal and state regulations concerning equal opportunity and non-discrimination in housing opportunity.

OBJECTIVE 3.4: The Town shall adopt appropriate regulations and mechanisms which ensure that historically significant housing will be preserved and protected for future uses.

Policy 3.4.1: Assist in the rehabilitation and adaptive reuse of historically significant housing through technical assistance and economic assistance programs such as grant applications, transfer of development rights, and designation of historically significant districts.

Policy 3.4.2: Request assistance from the State of Florida, Bureau of Historical Resources and other appropriate historical organizations in efforts to provide public information, education and technical assistance relating to historic preservation programs.

OBJECTIVE 3.5: The Town will ensure that available governmental programs are being utilized to extend and conserve the useful life of the existing housing stock and provide improvement of neighborhood quality.

Policy 3.5.1: Ensure that urban revitalization grant applications and capital improvement bond programs include funding for public infrastructure and support facilities to upgrade the quality of existing neighborhoods.

Policy 3.5.2: Prior to implementation of any approved urban revitalization program, research and ensure the availability of relocation housing.

Policy 3.5.3: Prior to implementation of governmental programs, create qualified representative citizen advisory groups to provide input to each program administration.

OBJECTIVE 3.6: The Town through adoption and implementation of the Housing Element and Town Zoning Map shall provide adequate and appropriate densities and sites for extremely-low, very low, low and moderate income families, group homes, and mobile homes.

Policy 3.6.1: The Town shall provide adequate housing sites for low and moderate income families, and mobile homes.

Policy 3.6.2: Pursuant to formal adoption of the Town Comprehensive Plan, Town Land Development Regulations and Town Zoning Map, the specific principals and criteria established within each guidance mechanism shall be effectively implemented to ensure proper location for low and moderate income housing, mobile homes, group homes and foster care facilities, and households with special housing needs, to include necessary infrastructure and public facilities to support such development.

OBJECTIVE 3.7: In conformance with Objective 5 and Policy 5-3 of this element the Town shall require availability of relocation housing as a prerequisite to implementation of housing revitalization activities.

Policy 3.7.1: The availability of relocation housing shall be researched and verified by Town staff prior to commencement of any governmental revitalization program enacted by the Town.

OBJECTIVE 3.8: The Town shall initiate each of the identified programs and/or activities in a timely manner as designated in the Housing Element as formulation of the intended housing implementation program for the town.

Policy 3.8.1: The Town shall continuously monitor each program/activity identified for implementation in the adopted Housing Element to ensure the timely initiation and execution of such designated housing implementation programs and activities.

CHAPTER FOUR

INFRASTRUCTURE ELEMENT

THIS PAGE LEFT BLANK INTENTIONALLY

Chapter Four

Infrastructure

A. GENERAL

GOAL 4A: TO HAVE ORDERLY DEVELOPMENT WHICH MAXIMIZES THE EFFICIENT USE OF EXISTING FACILITIES AND NATURAL RESOURCES AND PROVIDES THE ADOPTED LEVEL OF SERVICE CONCURRENT WITH DEVELOPMENT

OBJECTIVE 4A.1: All proposed development will go through a process of review to determine whether the proposed development will meet the adopted level of service standards.

Policy 4A.1.1: The Town may consider extending water service to development which is beyond the Town limits where doing so is consistent with other affected portions of this Comprehensive Plan.

Policy 4A.1.2: The Town Clerk will track available capacity that states the daily flows for the water system, and monthly volume of solid waste collected, with a statement of available capacity for each facility.

Policy 4A.1.3: The Town Clerk shall update the estimate of Town population served by town facilities on an annual basis.

Policy 4A.1.4: At the time of development permit application the estimated consumption of water and production of both sewage flow and solid waste shall be determined by the appropriate development review personnel and a development permit shall be issued under the condition that a Certificate of Occupancy will be issued only if water, septic, drainage, and solid waste facility capacities are available, at the time a Certificate of Occupancy is sought, to serve the proposed development at a level of service which is no less than the adopted level of service standards.

Policy 4A.1.5: Prior to issuance of a development permit, the Town shall require evidence of a stormwater management permit application to the Southwest Florida Water Management or other appropriate permitting authority. District standards, for all types of developments which are required to obtain such a permit under Florida Administrative Code 40D-4 and 40D-40, shall be applied.

Policy 4A.1.6: Level of service standards adopted in the Capital Improvements Element are hereby stated for septic systems, solid waste, drainage, and potable water facilities and shall be the basis on which capacity availability shall be determined:

Septic Systems	Equivalent to the Florida Administrative Code
Solid Waste	1.43 pounds per capita per day.
Drainage Facilities	Equivalent to the regulations of the Southwest Florida Water Management District for open basins as provided for in Florida Administrative Code 40D-4, and 40D-40 but in addition removing all exemptions for all subdivisions, residential, commercial, and industrial land uses. In all cases, the post-development peak rate and amount of discharge may not be greater than the pre-development peak rate and amount of discharge.
Potable Water	Town: 65 gallons per capita per day

Policy 4A.1.7: Amendments to the Comprehensive Plan and/or Future Land Use Map shall not be approved unless adequate capacity is either available or assured through other means to service the anticipated demand of new population and commerce brought about by any and all Comprehensive Plan amendments.

Policy 4A.1.8: Operation, design, and maintenance of all septic, potable water, drainage, and solid waste facilities shall be done in a manner which minimizes the opportunity and effects of facility-associated pollution on water and air systems.

Policy 4A.1.9: Needless duplication of services shall be avoided near jurisdictional boundaries.

Policy 4A.1.10: Facility life shall be extended through the use of reuse, recycling, composting, by-product and energy recovery methods.

Policy 4A.1.11: Protect water supplies by requiring "local sources first" whereby all available alternative water sources including, but not limited to, desalination, effluent reuse and mandatory conservation measures are implemented prior to mandated transfers of potable water resources.

B. SEPTIC SYSTEMS

GOAL 4B: TO PROVIDE SANITARY TREATMENT OF WASTEWATER IN AN ENVIRONMENTALLY SAFE MANNER THROUGH THE YEAR 2020.

OBJECTIVE 4B.1: The Town shall develop at densities that permit the use of septic or other onsite systems, but shall do so in such a way as to not preclude the use of a centralized sewer system in the future.

Policy 4B.1.1: All septic systems shall be sited, operated and maintained in accordance with the rules cited in the Florida Administrative Code 10D-6.

Policy 4B.1.2: Each year, the Planning Commission shall review progress toward a regional wastewater system, topics shall include but not be limited to: average peak flow and design capacity for facilities, components of system design, and other technical considerations as needed.

Policy 4B.1.3: Any package plants providing sanitary sewer service to new development shall be designed so as to be compatible with any future centralized sanitary sewer system.

C. SOLID WASTE

GOAL 4C: THE TOWN'S CONTRACTED COLLECTION SERVICE SHALL COLLECT AND DISPOSE OF NON-HAZARDOUS SOLID WASTE IN A MANNER WHICH IS ENVIRONMENTALLY SAFE AND WHICH PROMOTES RESOURCE RECOVERY WITH A GOAL TOWARD MANDATORY COLLECTION TOWN-WIDE BY 2015.

OBJECTIVE 4C.1: The Town's contracted collection service will continue to dispose of solid waste, in coordination with the county and to participate in any county-level recycling operation.

Policy 4C.1.1: The Town shall in cooperation with Levy County provide a solid waste monitoring system to assess the amount and type of material contained within the town's solid waste stream with the objective of obtaining a 30% reduction in the volume generated for disposal by 2020.

Policy 4C.1.2: The Town shall continue to provide the necessary equipment, personnel and facilities to ensure the continued level of service for solid waste disposal.

Policy 4C.1.3: The Town shall continue to cooperate and promote Levy County's Amnesty Days' for proper disposal of hazardous wastes.

Policy 4C.1.4: The Town shall require that all hazardous waste generators within the Town properly manage their hazardous wastes in conformance with mandates of the Federal Resource Conservation and Recovery Act and other pertinent, State and Local Government legislation.

D. DRAINAGE

GOAL 4D: STORMWATER SHALL BE MANAGED FOR RUNOFF QUALITY AND QUANTITY.

OBJECTIVE 4D.1: Immediately after completion of the final report of the Southwest Florida Water Management District's stormwater management study of Inglis and Yankeetown, whichever occurs first, the Town shall begin the preparation of a master drainage plan for management of stormwater quantity and quality. The plan shall specify drainage improvements, costs, priority projects, funding and regulation associated with a drainage control system for the entire Town, while maximizing the use of existing facilities and limiting urban sprawl.

Policy 4D.1.1: The master drainage plan shall include a schedule of improvement projects needed to maintain, repair, and construct stormwater management facilities to achieve and maintain the level of service standards adopted in Policy 4A.1.6. The schedule shall prioritize improvements to give greatest priority to maintaining and repairing existing stormwater management facilities; second priority to constructing new facilities to correct existing deficiencies; and, lowest priority to constructing new facilities to meet future growth needs.

Policy 4D.1.2: The master drainage plan shall include an analysis of the funding mechanism(s) enacted in accordance with Policy 4D.2.1 and recommendations for revisions, if needed, to accrue sufficient funds to construct projects in accordance with the schedule of improvements.

Policy 4D.1.3: The Town shall amend the comprehensive plan, as part of the five-year evaluation and appraisal process, to include the results and recommendations of the drainage master plan in the drainage data and analyses. The Five-year schedule of capital improvements will be reviewed yearly and be revised to include drainage improvement projects to be constructed during the next five year period.

OBJECTIVE 4D.2: The Town shall utilize annual update of the Capital Improvements Element as a means to evaluate how to fund needed stormwater management maintenance, repairs, and construction, which will reserve funds in advance of need.

Policy 4D.2.1: The Town shall continue to administer provisions for funding stormwater management improvements by establishing a monthly stormwater management fee or by use of general revenues such as ad valorem taxes.

Policy 4D.2.2: The Town shall establish a budgetary reserve fund in which revenues received from the funding provisions adopted as required by Policy 4D.2.1 shall accrue.

OBJECTIVE 4D.3: The Town shall verify that all development meets or exceeds the adopted stormwater management (drainage) level of service standards.

Policy 4D.3.1: For all development that is required to be permitted by Chapters 40D-4 and 40D-40 of the Florida Administrative Code, the Town shall require the applicant for the development to demonstrate that the proper stormwater management permits have been obtained from the Southwest Florida Water Management District before a final development order is issued, the final development order shall include the condition that a certificate of occupancy shall not be issued until the Southwest Florida Water Management District certifies that the stormwater management structure(s) have been built to the specifications in the approved development plan.

Policy 4D.3.2: (Reserved)

Policy 4D.3.3: For all development and redevelopment, post-development peak rates and amounts of stormwater runoff shall not exceed pre-development amounts at the adopted level of service design standards which shall be no less than the standards specified by the Florida Administrative Code Chapters 40D-4 and 40D-40 (effective on March 1, 1988.) Stormwater management facilities shall treat stormwater for removal of pollutants in such a manner as to meet or exceed the surface water quality standards specified in Chapter 17-302, Florida Administrative Code.

E. POTABLE WATER

GOAL 4E: TO PROVIDE A SAFE, ADEQUATE SUPPLY OF POTABLE WATER TO TOWN RESIDENTS AND BUSINESSES THROUGH THE YEAR 2020.

OBJECTIVE 4E.1: The Town shall have all zones of influence, and cones of depression defined for Town potable water wells and maintain up-to-date zone of influence and cone of depression data on all of the Town's existing and future public potable water supply wells.

Policy 4E.1.1: The Town, in cooperation with the Southwest Florida Water Management District, shall define the cone of depression and zone of influence for all potable water wells that are in existence, planned, acquired, or drilled after adoption of this Plan.

Policy 4E.1.2: The Town shall re-define the cone of depression and zone of influence for all potable waterwells at the time a consumptive use permit is sought for a greater daily withdrawal of water.

Policy 4E.1.3: The Town shall undertake a plan amendment, at such time(s) as the cones of depression and zones of influence are revised if the 200-foot protection zone established in Policy 5E.2.3 and the 300-foot protection zone established in Future Land Use Element Policy 1.3.2 are not sufficient, to increase the protection zones to include the entire cones of depression and zones of influence.

OBJECTIVE 4E.2: In accordance with requirements of Chapter 163, Florida Statutes, the Town shall implement regulations which will restrict the use of hazardous substances in the zone of influence of Town potable water wells.

Policy 4E.2.1: All proposed development which is to be located in the zone of influence of a town-owned potable water well shall be reviewed during the development review process for the purpose of determining if materials to be used or stored at the proposed development are hazardous materials.

Policy 4E.2.2: All development orders or certificates of occupancy issued by the Town, for properties located within the zone of influence of Town potable water wells, shall have conditional statements that regulate existing and future use of hazardous materials according to the Town's zone of influence-hazardous materials ordinance.

Policy 4E.2.3: No septic systems shall be permitted within at least 200 feet, or within the actual zone of influence of a Town public potable water supply well, whichever is greater.

OBJECTIVE 4E.3: By 2020, the Town shall develop a Water Shortage Plan which will provide policy and guidance for water use restrictions in case of a water shortage.

Policy 4E.3.1: The Town shall continue to enforce water use restrictions during a Southwest Florida Water Management District declared water shortage, and include at a minimum, the Southwest Florida Water Management District water shortage use guidelines in any town water shortage plan.

OBJECTIVE 4E.4: The Town shall require the use of water conservation techniques and measures for all new development and redevelopment.

Policy 4E.4.1: The Town shall revise its Land Development Regulations to include requirements for water conserving devices, water re-use, educational campaigns and materials and xeriscape techniques.

Policy 4E.4.2: The Town's Land Development Regulations shall permit the use of greywater systems for irrigation purposes, or other appropriate re-use applications.

Policy 4E.4.3: The Town's Land Development Regulations shall require the installation of water saving fixtures and devices in new and retro-fitted buildings.

Policy 4E.4.4: The Town shall use its water system billing mail-out at least once each year to provide customers with water conservation tips, and shall be used to inform customers of the rules whenever the Southwest Florida Water Management District mandatory conservation measures are in effect.

OBJECTIVE 4E.5: The Town shall work with all stakeholders as a participant in the Southwest Florida Water Management District's water supply planning processes to ensure water supplies remain adequate to serve expected growth to the end of the planning period.

Policy 4E.5.1: Effective concurrency management requires potable water facilities shall be in place and available to serve new development no later than the issuance by the local government of a certificate of occupancy or its functional equivalent.

Policy 4E.5.2: Prior to approval of a building permit or its functional equivalent, the land use officer shall consult with the applicable water supplier to determine whether adequate water supplies to serve the new development will be available no later than the anticipated date of issuance by the local government of a certificate of occupancy or its functional equivalent.

F. AQUIFER RECHARGE

GOAL 4F: TO MAXIMIZE THE RECHARGE ABILITY OF DEVELOPED LAND AND INSURE A SAFE, PLENTIFUL SUPPLY OF POTABLE WATER.

OBJECTIVE 4F.1: The Town's Land Development Regulations shall include development requirements which will serve to protect the function of natural groundwater recharge areas and natural drainage features.

Policy 4F.1.1 (Reserved)

Policy 4F.1.2: In an effort to eliminate potential sources of groundwater pollution it shall be the concern of the Town Commission to compile a listing of all known and suspected underground storage tanks, and to require abandoned or leaking tanks to be removed, repaired, or otherwise neutralized by the land owner at the time of property development, redevelopment, or remodeling.

THIS PAGE LEFT BLANK INTENTIONALLY

CHAPTER FIVE

CONSERVATION ELEMENT

THIS PAGE LEFT BLANK INTENTIONALLY

Chapter Five

Conservation Element

GOAL 5: TO PRESERVE, CONSERVE, AND APPROPRIATELY MANAGE ALL OF THE NATURAL RESOURCES OF THE TOWN AND TO PROVIDE PROTECTION OF UNIQUE AND ENVIRONMENTALLY SENSITIVE LANDS, LIFE, AND PROPERTY FROM NATURAL AND MAN-MADE HAZARDS.

OBJECTIVE 5.1: The air in the Town shall meet or exceed the minimum air quality levels established by Florida Department of Environmental Protection.

Policy 5.1.1: The Town shall consider the cumulative effects of development on air quality in project review, mitigation measures shall be implemented where needed to avoid deterioration of the ambient air quality.

Policy 5.1.2: The Town shall maintain good ambient air quality through the adoption of codes, ordinances and regulations which address acceptable levels of emissions and smoke, as well as factors contribute to enhancement of air quality, such as landscaping, and tree protection.

OBJECTIVE 5.2: The Town shall protect and properly manage the quality and quantity of all surface waters.

Policy 5.2.1: The Town shall support all research activities by public agencies designed to assist in the management of the Gulf Coastal Lowlands and the Withlacoochee River floodplains.

Policy 5.2.2: The Town shall coordinate use and development of land within the 100-year floodplain to support proper ecological function of the Withlacoochee River and adjacent bottomlands, enhance surface and groundwater quality, and help manage the risks of development in floodprone areas.

Policy 5.2.3: The Town shall prohibit the dredging and filling of lands within floodplains, unless approved by the appropriate jurisdictional authorities, to preserve the natural functions of the 100-year floodplain so that flood-calming and flood storage capacities are maintained.

Policy 5.2.4: Issuance of any development permit in the floodplain for either new construction or significant alternation to existing structures shall preserve the natural functions of the 100-year floodplain so that flood-calming and flood storage capacities are maintained.

Policy 5.2.5: The storage and use of hazardous materials or waste shall be prohibited in the 100-year floodplain.

Policy 5.2.6: For proposed development in special flood hazard areas, site plan review shall determine whether a proposed development is consistent with Flood Damage Prevention standards contained in the land development code prior to the issuance of any development permit by the Town.

Policy 5.2.7: When issuance of a development permit in a special flood hazard area requires action by the Planning Commission, then the Town Building Official shall help the commission to administer the issuance of a development permit pursuant the standards of the land development code. In all other cases, the Town building official shall act to coordinate permit review and issuance as required by the Town's Land Development Regulations.

Policy 5.2.8: The Town shall continue to regulate land use and development in flood hazard areas by requiring conformance with the provisions of the Town's floodplain regulations and requirements of the National Flood Insurance Program as provided by the Federal Emergency Management Agency. The Town's floodplain management regulations shall be reviewed, and revised as necessary, to be consistent with the provisions of this Plan.

Policy 5.2.9: During construction, all development shall use appropriate screening materials which will prevent run-off and siltation from entering adjacent waters, wetlands and floodplains.

Policy 5.2.10: The Town shall petition the County, and conservation area lessees for an agreement to establish best management practices for the protection of surface and groundwater quality in the adjacent county owned land and leased wildlife management areas of the Gulf Coastal Lowlands. When research recommendations are available, they shall be reviewed and considered for incorporation into the appropriate elements of the adopted Comprehensive Plan.

Policy 5.2.11: The Town shall maintain a stormwater management ordinance to: protect the quality and quantity of water resources, and to supplement State and Southwest Florida Water Management District regulations, and to maintain the adopted level of service standards.

Policy 5.2.12: Incorporate applicable stormwater management technical requirements of the Southwest Florida Water Management District into the town's stormwater management ordinance in accordance with the adopted level of service standards.

OBJECTIVE 5.3: The Town shall maintain actions to properly protect and conserve the quality and quantity of groundwater resources in the Town.

Policy 5.3.1: The Town, in cooperation with the Florida Department of Environmental Protection and Southwest Florida Water Management District, shall continue to monitor the quality and quantity of groundwater resources.

Policy 5.3.2: Development shall be permitted only if it does not adversely impact the Town's natural resources and it is in compliance with all applicable Federal, State, and local regulations.

Policy 5.3.3: The Town shall cooperate with the Florida Department of Environmental Protection, the Southwest Florida Water Management District, the Town of Yankeetown, and the County to provide protection for all public water supply wells.

Policy 5.3.4: Prior to development approval, an inspection should be conducted to properly identify active drainage wells, if any wells are found the developer shall be responsible for sealing the drainage wells.

Policy 5.3.5: The Town shall investigate methods for treatment of stormwater runoff from developed areas and require stormwater control to meet the adopted level of service standards, or if exempted from the stormwater management level of service requirement (agriculture and silviculture), to use best management practices according to Florida Admiration Code 17-25 and the State Section 208 Plan.

Policy 5.3.6: The Town shall continue to cooperate with the Southwest Florida Water Management District by requiring as-built surface water management systems to be approved (meeting Southwest Florida Water Management District permit specifications) by the Southwest Florida Water Management District before a Certificate of Occupancy is issued for new development, or redevelopment.

Policy 5.3.7: The Town shall cooperate, as appropriate, with the designated programs of the County, Southwest Florida Water Management District, the Florida Department of Environmental Protection, and other such applicable agencies in the identification and protection of water recharge areas to prevent aquifer depletion and contamination.

Policy 5.3.8: The Town Commission shall request the Florida Geological Survey, to evaluate the potential for geologic hazards in the Town and to assist in developing plans to reduce the impacts of sinkholes.

Policy 5.3.9: Proposed development equal to eighty percent (80%) of the threshold size for a potential Development of Regional Impact will be required to fully evaluate all geologic and hydrologic conditions on-site prior to development.

Policy 5.3.10: The Town shall prepare a composite map which illustrates soils, native vegetative communities, geology, wetlands, surface water and ground water information and which:

- (1) Defines areas that have physical limitations and potentials for various types of land use; and
- (2) Defines the appropriate land uses based upon the land's physical limitations and potentials.

When completed, the composite map will be utilized by all subdividers and developers as the basis for documenting how they propose to protect and use, conserve or preserve these resources.

The composite map shall be used in the comprehensive planning process to direct incompatible land uses away from wetlands.

Policy 5.3.11: Mineral extraction activities shall be prohibited in the Town limits.

Policy 5.3.12: Prior to receiving a development order, the Town shall require that proposals for commercial or multi-family development demonstrate that the proposed project will not adversely affect water quantity or quality. Residential development that is exempt from development order review is required to use stormwater best management practices within the building permit process.

OBJECTIVE 5.4: Protect soils and minimize the rate of erosion caused by land development and other human activities.

Policy 5.4.1: As part of the development review process the Town shall consult with the Natural Resources Conservation Service on use of Best Management Practices to minimize soil erosion problems associated with a proposed development, and the construction process of a proposed development.

Policy 5.4.2: The Town shall require topographic, hydrologic and vegetative cover to be depicted on all site plans of proposed commercial, industrial, public building, subdivision, and multi-family development, and development design shall be compatible with the natural functions of these factors; the site plan review process in the Town's Land Development Regulations shall reiterate this requirement.

Policy 5.4.3: The Town shall adopt a tree protection ordinance and a landscape ordinance to assist in control of soil erosion.

Policy 5.4.4: The Town shall require utilization of best management practices, and compliance with all adopted level of service standards in construction of stormwater facilities and structures.

Policy 5.4.5: The Town shall encourage the use of paving blocks (turf block) and other approved pervious surfaces to retain properties of soil permeability and encourage their use as a porous surface bonus to developers.

OBJECTIVE 5.5: The Town shall take appropriate actions to minimize impacts on existing relic hardwood communities, the habitat of species that are endangered, threatened, or are species of special concern and shall provide appropriate protective measures for environmentally sensitive land and unique vegetative communities.

Policy 5.5.1: The Town shall assist in the application of, and compliance with, all State and Federal regulations which pertain to endangered, threatened, species of special concern and potentially endangered species.

Policy 5.5.2: The Town shall consult with the Florida Fish and Wildlife Conservation Commission, the Natural Resources Conservation Service, and the United States Department of Agriculture - Division of Forestry prior to the issuance of a development order where species that are endangered, threatened, or species of special concern are known to exist. If found to have adverse impact on the species or habitat, mitigation measures and/or compensation shall be required.

Policy 5.5.3: The Town shall consult with the Florida Fish and Wildlife Conservation Commission, U.S. Soil Conservation Service, adjacent local governments and private landowners to develop Best Management Practices to protect valuable relic hardwood communities, species of special concern, and endangered, or threatened species.

Policy 5.5.4: The Town shall adopt a tree protection and landscape ordinance to assist in the protection of specimen trees, relic hardwoods communities and wildlife habitat.

Policy 5.5.5: The Town shall, through proper site plan review procedure and specific implementation of the Town Land Development Regulations, provide protection of 100-year flood areas, wetlands, and other potential environmentally sensitive lands within the town.

Policy 5.5.6: The Town shall continue to coordinate development activities with the County to ensure the conservation, protection and appropriate use of shared, unique vegetative communities such as the relic hardwood communities and the Gulf Coastal Lowlands.

Policy 5.5.7: Exotic and invasive plant species shall be eradicated from development areas and replaced with native species at the time of development.

OBJECTIVE 5.6: The Town shall strive to enhance efforts in reduction, disposal and management of hazardous materials and hazardous waste.

Policy 5.6.1: The Town shall assist the County in its efforts to manage hazardous wastes and protect natural resources through educational programs that advise town residents on the problems and issues of hazardous waste.

Policy 5.6.2: The Town shall, in cooperation with the County, develop an emergency response plan to facilitate control of accidents involving hazardous materials and hazardous wastes.

Policy 5.6.3: The Town shall cooperate with the County in the continuation and promotion of the Amnesty Days program for collection of hazardous materials.

Policy 5.6.4: The Town shall cooperate with the County in the management program for proper storage, recycling, collection and disposal of hazardous materials.

OBJECTIVE 5.7: The Town shall maintain proper actions to preserve, conserve, develop and improve the visual resources and aesthetics of the community.

Policy 5.7.1: The Town shall adopt and implement a tree protection ordinance to conserve and preserve certain existing trees and require the planting or replanting of trees in the town.

Policy 5.7.2: The Town shall review and revise the existing sign ordinance to enhance aesthetic qualities and protect the health, safety and welfare of its residents.

Policy 5.7.3: The Town shall adopt and implement tree protection and landscape ordinances to assist in the control of soil erosion, maintain the individual integrity of various land uses and enhance aesthetic qualities of the community as a whole.

Policy 5.7.4: The Town shall incorporate the development of greenways and park and open space planning with the strategies to preserve natural areas and the function of natural features.

OBJECTIVE 5.8: Per capita water use shall be reduced through conservation practices and programs such as an assessment of the effectiveness of the existing conservation incentive water rate structure.

Policy 5.8.1: The Town shall research and adopt criteria for the use of wastewater reuse plans where applicable.

Policy 5.8.2: The Town shall research and implement an emergency water conservation plan. Until the Town adopts a water conservation plan it shall defer to the plans of the Southwest Florida Water Management District.

OBJECTIVE 5.9: The Town shall maintain proper actions to preserve, conserve, improve and protect fisheries, wildlife habitat and marine habitat.

Policy 5.9.1: The Town recognizes the Withlacoochee River as the primary focus for habitat protection efforts and hereby enacts an environmentally sensitive overlay zone adjacent to the river. Other water features such as Harrison Branch, lakes, ponds sinkholes and wetlands as determined by a certified wetlands delineator shall also be afforded the protections of the environmentally sensitive overlay zone. The following policies shall be used to implement the overlay zone.

- (1) Determination of Boundaries. The environmentally sensitive overlay zoning extends from the mean high water line landward to a point 30 feet landward of the water's edge. Environmentally sensitive overlay zone boundaries shall be generally depicted on the Wetlands and Environmentally Sensitive Areas Map, contained within the Future Land Use Plan Map series, and will be shown adjacent to the Withlacoochee River shoreline, Harrison Branch, sinkholes, wetlands and ponds or lakes on that map document.
- (2) Protective Measures. Reasonable protective measures necessary to prevent significant adverse effects on environmentally sensitive overlay zones shall be required for development approval on properties that contain any portion of the zone. The factual basis of the decision to require the measure(s) shall be stated as a finding in the written record, and necessary protective measures shall be stated conditions in preliminary and final development orders. Protective measures include, but not limited to:
 - a. Maintaining natural drainage patterns,
 - b. Limiting removal of vegetation to the minimum necessary to carry out the development activity,
 - c. Expeditiously replanting denuded areas,
 - d. Stabilizing banks and other unvegetated areas by siltation and erosion-control measures,
 - e. Minimizing the amount of fill used in the development activity,
 - f. Disposing of dredged spoil at specified locations in a manner causing minimal environmental damage,
 - g. Prohibiting construction of channels,
 - h. Prohibition of the dredging and filling of wetlands,
 - i. Designing, locating, constructing and maintaining all development in a manner that minimizes environmental damage,
 - j. Using deed restrictions and other legal mechanisms to require the developer and successors to protect the environmentally sensitive areas and maintain the development in compliance with the protective measures,
 - k. Aesthetic and view scape protection measures as deemed appropriate by the planning commission or the town commission.

- (3) Exceptions. Certain activities are presumed to have an insignificant adverse effect on the beneficial functions of the environmentally sensitive overlay zones. The following activities may be undertaken unless it is shown by competent and substantial evidence that the specific activity would have a significant adverse effect on the protected environmentally sensitive zone:
- a. The following uses and activities are presumed to have an insignificant adverse effect on wetlands protection zones:
 1. Scenic, historic, wildlife, or scientific preserves,
 2. Minor maintenance or emergency repair to existing structures or improved areas.
 3. Timber catwalks, docks and trail bridges that are less than or equal to four feet wide, provided that no filling, flooding, dredging, draining, ditching, tiling or evacuating is necessary for the installation of pilings,
 4. Commercial or recreational fishing or hunting, and creation and maintenance of temporary blinds,
 5. Constructing fences where no fill activity is required and where navigational access will not be impaired by construction of the fence,
 6. Maintaining existing channels (i.e., channels in existence at the time of the adoption of this chapter) at the minimum depth and width necessary to achieve their intended purposes, and designing them to prevent slumping and erosion and allow revegetation of banks,
 7. Minor maintenance or emergency repair to existing structures or improved areas,
 8. For each lot with shoreline, clearing of shoreline vegetation waterward of the water's edge, so as to provide a corridor not to exceed 15 feet in width, of sufficient length from the shore to allow access for a boat or swimmer to reach open water and landward of the water's edge so as to provide an open area not to exceed 25 feet in width,
 9. Commercial or recreational fishing, hunting or trapping and creation and maintenance of temporary blinds.
 10. Construction of new impervious surface area within the environmentally sensitive overlay zone is prohibited.
 11. Low-impact development practices shall be part of any approved variance in the environmentally sensitive overlay zone.

Policy 5.9.2: In response to new development, the Town shall apply land development regulations so as to encourage best practice in site development that preserves wildlife corridors and avoids fragmentation of habitat in support of species interface with biodiversity hotspots and dedicated conservation land.

OBJECTIVE 5.10: The Town shall review its Land Development Regulations to promote energy conservation and shall seek public participation as part of this process.

Policy 5.10.1: As part of the annual budgeting process, the Town shall review its energy use to identify if any unrealized energy conservation opportunities are feasible.

CHAPTER SIX

RECREATION AND OPEN SPACE ELEMENT

THIS PAGE LEFT BLANK INTENTIONALLY

Chapter Six

Recreation and Open Space Element

GOAL 6: THE PROVISION OF SUFFICIENT AND ADEQUATE RECREATION AND OPEN SPACE OPPORTUNITIES ENABLING HIGH QUALITY PARTICIPATION FOR ALL RESIDENTS AND VISITORS OF THE TOWN.

OBJECTIVE 6.1: Continue to administer programs and development oriented mechanisms that provide a system of parks and recreation facilities that will accommodate the existing needs and future demands of the towns' population.

Policy 6.1.1: To ensure that its parks and recreational facilities keep pace with growth, the Town shall adopt Tables 6-1, 6-2 and 6-3, Recreation and Facility Standards, for planning future park and recreational facility needs.

Policy 6.1.2: Realize the full development and high quality of existing recreation areas and facilities through the continued use of available grant funding mechanisms and agencies, intergovernmental coordination functions with the County, coordination with volunteer organizations, and adequate operating budgets and proper resource management techniques.

Policy 6.1.3: The Town shall review and revise current subdivision regulations, as necessary, to ensure that recreation and open space impacts of new development are mitigated such that proportional impacts of development are satisfied and adverse financial impact will not result.

Policy 6.1.4: The Town, through petitions for interlocal agreements, shall promote multiple-use of school recreation facilities under proper supervision of the County School Board.

OBJECTIVE 6.2: Consistent with plan implementation requirements the Town shall maintain a sufficient amount of open space to provide a harmonious balance between requirements of continuing urbanization and spatial needs of the resident population.

Policy 6.2.1: The Town shall maintain land development regulations that provide specific open space standards and definitions, and address parameters of tree protection, landscape, and signage in relationship to utilization of such open space.

Policy 6.2.2: The Town shall develop and utilize specific open space and impervious surface ratio criteria as part of its development review process.

Policy 6.2.3: The Town shall continually investigate and utilize state and federal funding programs to enhance and expand recreation and open space facilities.

Policy 6.2.4: The Town shall utilize the concept and use of open space as part of the system of neighborhood parks.

OBJECTIVE 6.3: The Town shall provide and maintain good, operational park and recreation access for all segments of the town population.

Policy 6.3.1: Town parks and recreation facilities shall be designed and constructed with accessways that are compatible with the character and quality of the resources and activities contained within the site.

Policy 6.3.2: All public recreation facilities shall be designed as barrier-free as possible to accommodate accessibility by the elderly, the very young and the handicapped.

OBJECTIVE 6.4: In conformity with plan adoption, the Town shall continue to monitor, improve and coordinate efforts with the public and private sectors as a means of increasing recreational opportunities.

Policy 6.4.1: The Town shall attempt, through interlocal agreements, to obtain assistance from the County and the County School Board in provision of needed and desired recreation facilities.

Policy 6.4.2: The Town shall research and provide alternatives for developers in provision of recreation facilities for their projects such as in-lieu of fees, and direct site transfers where applicable.

OBJECTIVE 6.5: The Town shall provide and maintain good access to natural resource parks and open spaces for all segments of the town population.

Policy 6.5.1: Public acquisition shall serve as a primary method to obtain open space to preserve features of the natural environment and create parkland.

Policy 6.5.2: Public access to surface water bodies and beaches will increase, while existing access to these resources should be upgraded whenever possible.

Policy 6.5.3: Design public recreational facilities capable of providing venues to the artistic and cultural events of the community.

Policy 6.5.4: Recreational trail systems will function to link established neighborhoods to new development through trail expansion and connectivity.

Policy 6.5.5: On a continuing basis, support will be given to those projects that encourage walking, bicycling, and general use of the recreational trail system.

Policy 6.5.6: Preservation of the natural environment shall be promoted through the development of Recreational Trail Systems, Greenways, and Natural Corridors.

Policy 6.5.7: Natural areas will be managed through coordinated action between all concerned federal, state, local and non-profit agencies and organizations.

Policy 6.5.8: Local actions necessary for the connections to the Cross Florida Greenway will proceed on an organized basis that includes all interested partner agencies.

Policy 6.5.9: Preference shall be given to open space and environmental preservation efforts that restore degraded natural communities and natural hydrology.

Policy 6.5.10: Removal of invasive plant species shall accompany conversion of land to open space use.

TABLE 6-1
PARK CLASSIFICATION STANDARDS

Facility	Location	Service Area	1,000 Population	Population Served	Park Adjoining School	Separated Park	Facilities
Equipped Play Area/Tot Lot Park	Neighborhood area adjacent to elementary school when feasible	2 -3 block area	1/2 acre	Up to 2,500	Minimum of 1/4 acre	Minimum of 1 acre	Open space, park benches, play apparatus, some landscaping, picnic table optional
Neighborhood Park	Neighborhood area adjacent to elementary school when feasible	1/4 - 1/2 mile	2 acres	Up to 5,000	Minimum of 2 acres	Minimum of 5 acres	Play apparatus areas, recreation building, sports fields, paved multi-purpose courts, courts, senior citizens area, picnic area, open or free play area, landscaping
Community Park	Designed to serve residents of a group of neighborhoods, adjacent to Jr. or Sr. high school when feasible	1/2 - 3 miles	2 acres	Up to 25,000	Minimum of 5 acres	Minimum of 20 acres	All the facilities found in a neighborhood park plus facilities to serve the entire family. Pools, softball/baseball fields, tennis courts, play areas, picnic areas, passive and active recreation areas, multi-purpose courts and recreation building

CHAPTER SEVEN

INTERGOVERNMENTAL COORDINATION ELEMENT

THIS PAGE LEFT BLANK INTENTIONALLY

Chapter Seven

Intergovernmental Coordination Element

GOAL 7: TO ESTABLISH VIABLE MECHANISMS AND PROCESS AMONG THE PERTINENT GOVERNMENTAL, PUBLIC AND PRIVATE ENTITIES TO ENSURE AWARENESS AND COORDINATION OF ALL DEVELOPMENT ACTIVITIES, AND PROVIDE EFFECTIVE AND EFFICIENT UTILIZATION OF ALL AVAILABLE RESOURCES TO ULTIMATELY ENHANCE THE QUALITY OF LIFE FOR PRESENT AND FUTURE POPULATIONS.

OBJECTIVE 7.1: To initiate formal mechanisms, process, and Memorandums of Agreement which establish specific intergovernmental coordination activities to occur on a systematic basis so as also to ensure adoption of interlocal agreements within one year of adoption of the amended intergovernmental coordination element, pursuant to the requirements of Section 163.3177(6)(h)(2)., Florida Statutes, as amended.

Policy 7.1.1: The Town Commission shall be responsible for ensuring an effective intergovernmental coordination program, for the Town.

Policy 7.1.2: The Town shall in Coordination with the County, Citrus County and the Florida Department of Transportation ensure that consistent level of service standards are maintained on major roadways in and around the Town through the use of frontage roads, limitation and cooperative use of ingress/egress drives, proper signalization, and required mitigation of development impacts.

Policy 7.1.3: The Town shall coordinate planning efforts with the Florida Department of Transportation, North Central Florida Regional Planning Council, the County, and Citrus County to establish mechanisms for delineation and adoption of corridor roadway systems in and around the Town to ensure appropriate evacuation routes and adequate right-of-way is available to meet potential future demand.

Policy 7.1.4: The Town shall coordinate traffic count inventory and analysis programs with the Florida Department of Transportation and the County.

Policy 7.1.5: The Town shall coordinate with the Florida Department of Transportation and the County in the development of future pedestrian and non-motorized vehicle modes of access along shared transportation facilities.

OBJECTIVE 7.2: Ensure that all land use planning and related development activities are coordinated with the County Comprehensive Plan, Citrus County and other entities with quasi-jurisdictional authority and/or level of service provision responsibility.

Policy 7.2.1: The Town shall coordinate activities with the County, and Citrus County to ensure consistent, specific consideration is given to density and intensity of land uses permitted along town/county fringe areas.

Policy 7.2.2: The Town and the County shall continue to coordinate land planning and necessary service provision efforts to ensure verification of adequate availability of essential services in all appropriate jurisdictional areas prior to issuance of local development orders.

Policy 7.2.3: The Town in cooperation with the County, the Florida Department of Environmental Protection and other affected local jurisdictions, shall continue support of the solid waste disposal and resource recovery system presently being implemented by the County.

Policy 7.2.4: The Town shall continue to coordinate land development impact mitigation efforts with Town of Yankeetown, the County, Citrus County, Southwest Florida Water Management District, Florida Department of Environmental Protection and other state and federal agencies that have permitting responsibility in the Town to ensure water quality, stormwater drainage, and flood control measures are affected consistent with impacts of development.

Policy 7.2.5: The Town shall initiate cooperative planning efforts with the Town of Yankeetown, the County, the County Schools, and Citrus County for provision of necessary parks and recreation facilities including bike/hiking trails and boating facilities to more efficiently and effectively meet future recreation demands.

Policy 7.2.6: The Town shall develop cooperative recreational planning efforts with the Florida Department of Environmental Protection, Division of Recreation and Parks for assistance in identifying available funding sources and providing review of proposed community park and recreation facilities.

Policy 7.2.7: The Town shall solicit recommendations from various quasi-public and private organizations such as the County Housing Authority, the County Building Department, the County Health and Welfare Departments, and the State of Florida, Division of Historical Resources to assist in identification of sites to be preserved for historical purposes and areas to be recommended for future community revitalization type actions.

Policy 7.2.8: The Town shall utilize the informal mediation process provided by the North Central Florida Regional Planning Council for resolving conflicts with other local governments when applicable.

Policy 7.2.9: The Town shall formalize future planning efforts with the Town of Yankeetown, the County, and Citrus County, including a needs assessment; a feasibility study; grant funding interlocal agreements; public private partnerships; and capital improvements planning, in potential provision of centralized sewer, potable water, and comprehensive drainage abatement issues.

OBJECTIVE 7.3: When ongoing coordination is needed, the Town shall seek to develop formal or informal joint planning processes with other units of local governments.

Policy 7.3.1: Development review process shall evaluate proposed development as it relates to the existing comprehensive plans of adjacent local governments.

Policy 7.3.2: The Town shall review present agreements and service provision procedures with private service and utility providers to ensure necessary services and utilities are provided in a coordinated, efficient and economic fashion to meet the needs of the expanding population.

OBJECTIVE 7.4: The Town shall actively participate with other affected local jurisdictions on development application reviews relating to projects that are expected to have extra-jurisdictional impacts.

Policy 7.4.1: The Town shall develop a formal review process for regional scale developments coordinated with all applicable reviewing agencies to review all impacts.

OBJECTIVE 1.4: The Town shall coordinate annexations and joint planning issues with the County and the other municipalities within the County.

Policy 1.4.1: Upon the annexation of any land into the Town, the Town shall begin the process of amending the Comprehensive Plan, establishing a future land use designation and a zoning designation.

Policy 1.4.2: In the interim period between annexation and amendment of the Comprehensive Plan, the Town shall implement the County's adopted Comprehensive Plan and Land Development Regulations.

CHAPTER EIGHT

CAPITAL IMPROVEMENTS ELEMENT

THIS PAGE LEFT BLANK INTENTIONALLY

Chapter Eight

Capital Improvements Element

GOAL 8: THE TOWN SHALL PROVIDE PUBLIC FACILITIES, AT AN ADOPTED LEVEL OF SERVICE WHICH SHALL BE MET FOR ALL EXISTING AND FUTURE DEVELOPMENT, THROUGH THE FINANCIAL COMMITMENT OF A FIVE-YEAR SCHEDULE OF CAPITAL IMPROVEMENTS, A CAPITAL IMPROVEMENTS PROGRAM AND A DEVELOPMENT PROCESS WHICH REQUIRES DEVELOPMENT TO BE CONCURRENT WITH THE TOWN'S ABILITY TO FINANCE AND COMPLETE NEEDED PUBLIC FACILITIES.

OBJECTIVE 8.1: Land use decisions (including future land use map amendments and all development orders) shall be coordinated with the town's financial commitment to expand facilities as stated in the Five-Year Schedule of Improvements, and Five-Year Capital Improvements Program, for the purposes of providing facilities that serve existing and future development at the adopted Level of Service standards.

Policy 8.1.1: Land use development orders shall be granted only when public facilities functioning at the adopted level of service exist, or will be available, concurrent with occupancy or use of such developed land.

Policy 8.1.2: The Town shall require all public and private capital facilities to operate and provide service at the level of service adopted in this Comprehensive Plan, for existing development, previously issued development orders, and future permitted development. These public facilities shall be provided concurrent with the impacts of a development.

Policy 8.1.3: The following Levels of Service are hereby adopted and shall be maintained for existing or previously permitted development and for new development or redevelopment in the town or the Town's utility service areas:

ELEMENT/FACILITY	STANDARDS
ROADWAYS	
Principal Arterials	Level of Service C at peak hour
Major and Minor collectors	Level of Service C at peak hour
RECREATION AND OPEN SPACE	
Facility Standards	
Picnic Table	20 per 6,000 persons
Baseball Field (Regulation)	1 per 6,000 persons
Tennis Court	1 per 2,000 persons
Basketball Court	1 per 5,000 persons
Volleyball Court	1 per 5,000 persons
Community Building	1 per 15,000 persons
Equipped Play Area	1 per 3,000 persons
Multi-Use Court	1 per 10,000 persons
Shuffleboard	1 per 6,000 persons
Handball Court	1 per 10,000 persons
Horseshoe Court	1 per 5,000 persons
Multisport Playfield	1 per 5,000 persons
Classification and Space Standards	
As specified in Table VI-1 and Table VI-2	
SANITARY SEWER, SOLID WASTE, DRAINAGE, POTABLE WATER AND NATURAL GROUNDWATER AQUIFER RECHARGE	
Septic Systems	Equivalent to the Florida Administrative Code 10 D-6.
Solid Waste	1.43 pounds per capita per day
Drainage	Equivalent to the regulations of the Southwest Florida Water Management District for open basins as provided for in Florida Administrative Code 40D-4, and 40D-40 but in addition removing all exemptions for all subdivisions, residential, commercial, and industrial land uses. In all cases, the post-development peak rate and amount of discharge may not be greater than the pre-development peak rate and amount of discharge.
Potable Water	65 gallons per capita per day average and peak use.

Policy 8.1.4: Proposed capital improvement projects shall be evaluated and ranked in order of priority according to the following guidelines:

- a) Whether the project is needed to: protect the public health and safety, to fulfill the Town's legal commitment to provide facilities and services, or to correct existing deficiencies or repair/replace worn or obsolete facilities; and
- b) Whether the project increases efficiency of use of existing facilities, prevents or reduces future improvement cost, provides service to developed areas lacking full service, or promotes in-fill development; and,

- c) Whether the project represents a logical extension of facilities and service from the town to the urban fringe, or is compatible with the plans of the State Agencies or the Southwest Florida Water Management District.

Policy 8.1.5: The Town shall include in its land development regulations a program for land dedication, or payment-in-lieu of dedication, or some other form of exaction, as a requirement of land subdivision or land development for the purpose of retaining easements for utility and traffic circulation systems, and for meeting all adopted levels of service.

Policy 8.1.6: The Town shall require all existing and future development to connect to the Town's potable water system. The Town's land development regulations pursuant to 163.3202, Florida Statutes, as amended, shall also state the same requirement.

Policy 8.1.7: The Capital Improvements Element shall be consistent with state statutes and updated and submitted to the state land planning agency by December 1 of each year. The Town shall convene two public hearings in October and November of each year to ensure adoption prior to December 1.

Policy 8.1.8: The Town shall adopt by reference all external agency plans that have a significant impact on quality of life or otherwise possess a nexus to adopted Level of Service standards:

OBJECTIVE 8.2: Decisions regarding the issuance of development orders and permits will be based upon coordination of the development requirements included in this plan, the Town's land development regulations, and the availability of necessary public facilities needed to support proposed development.

Policy 8.2.1: It shall be the responsibility of the Town's appointed development review agency to certify that all development orders are consistent with the Land Development Regulations, Comprehensive Plan, and Five-year Schedule of Capital Improvements.

Policy 8.2.2: The Town shall implement a methodology to monitor and track approved de minimis impacts on the roadway network within its jurisdiction. All de minimis impacts (an impact that would not affect more than one percent of the maximum volume at the adopted Level of Service of the affected transportation facility) shall be compiled into an annual report and submitted to the state land planning agency with the annual Capital Improvements Element update.

Policy 8.2.3: As part of annual update of the Capital Improvements Element, the Town's Public Works Director should submit for consideration a list of all capital improvements projects required to maintain roadway level of service, improve quality of service, enhance the mobility of pedestrians and bicyclists, and provide for a well designed ground transportation system.

OBJECTIVE 8.3: The Capital Improvements Element shall be updated annually to ensure financial feasibility of the Comprehensive Plan to reflect existing and projected capital needs in accordance with the adopted level of service.

Policy 8.3.1: Debt service and total expenditures shall balance annually budgeted revenues from all funds.

Policy 8.3.2: The Town shall reserve Water Fund surpluses, unless obligated otherwise, for water system capital improvements listed on the Five-Year Schedule of Capital Improvements, or for capital improvements expected to be needed in years after those specified on the Five-Year Schedule of Capital Improvements.

Policy 8.3.3: Efforts shall be made to secure grants whenever available to finance capital improvements. Grants that are not under the control of the Town during the annual update of this Element shall be considered "planned funds" and not be utilized during Years 1-3 in the Five-Year Schedule of Capital Improvements in order to meet the definition of financial feasibility.

Policy 8.3.4: The Town shall limit debt service by first budgeting needed revenue derived from existing sources, augmented by instituting increases, through user fees and ensuring financial contributions derived through private development is adequate.

Policy 8.3.5: Prior to formulating the annual budget potential sources of revenue shall be considered by the Town Commission for the coming budget year including: garbage collection franchise fee, taxes and franchise fees on utilities, fuel utilities, and the communications service fee.

Policy 8.3.6: The Town Commission shall consider the implementation of the stormwater management utility to fund maintenance costs of the stormwater management facilities in the town in accordance with Chapter 70, Article IV of the Town's Code of Ordinances.

Policy 8.3.7: The Town shall rely upon private contributions as a funding source within the Five-Year Schedule of Improvements only when the obligation to fund a specific capital improvement is addressed in an enforceable development agreement or development order. The Town shall not be responsible for funding capital improvements that are the obligation of the developer. If the developer fails to meet any capital improvement commitment that is programmed in the Five-Year Schedule of Capital Improvements, a plan amendment to delete the capital improvement from the Schedule shall be required.

Policy 8.3.8: New development shall bear a proportionate share of the cost of providing new or expanded public facilities and infrastructure required to maintain adopted levels of service through the town's adopted proportionate share ordinance, impact fees, site-related developer dedications, and developer contributions.

Policy 8.3.9: Each year the Planning Commission shall review progress toward a regional wastewater system, topics shall include but not be limited to: a needs assessment; a feasibility study; grant funding interlocal agreements; public private partnerships; and capital improvements planning.

Policy 8.3.10: The Town will comply with all State of Florida Law regarding the management of public debt.

OBJECTIVE 8.4: The 2009-2014 Town budget and Five-Year Capital Improvements Program shall be incorporated into the annual budget in order to reserve funds for capital facilities projected to be needed in the future by the comprehensive plan.

Policy 8.4.1: The Town's Treasurer or appointed financial advisor shall prepare the Five-Year Capital Improvements Program on an annual basis as part of the Town's Annual Budget; it shall address all capital needs of the town.

Policy 8.4.2: Review and update the Capital Improvements Element annually to ensure close coordination between the Capital Improvement Program process and the annual budgeting process. This coordination shall address development timing, financial feasibility, and the Goals, Objectives, and Policies of the Comprehensive Plan.

Policy 8.4.3: Prior to annual update of the Capital Improvements Element, the Town shall review and consider what could function as new sources of revenue for the Town by evaluating the benefits and any consequences.

OBJECTIVE 8.5: Capital improvements will be provided to correct existing deficiencies, to accommodate desired future growth, and to replace worn-out or obsolete facilities, as indicated in the Five-Year Schedule of Capital Improvements of this element.

Policy 8.5.1: The Town Commission, town employees, and interested citizens shall have the opportunity to participate in a capital facilities planning process for the purpose of evaluating and ranking in order of priority, projects proposed for inclusion in the Five-Year Schedule of Capital Improvements. The Five-year Schedule of Capital Improvements shall be consistent with the Capital Improvements Program that is included in the Town's Annual Budget.

Policy 8.5.2: Each project listed in the Five-Year Schedule of Capital Improvements shall be financially feasible. The Schedule shall be balanced so that total expenditures do not exceed total revenues.

Policy 8.5.3: The Town hereby adopts by reference the most recent edition of the Work Program as formally adopted by the Florida Department of Transportation District 2 into the Town's Five-Year Schedule of Capital Improvements.

Policy 8.5.4: The Town hereby adopts by reference the most recent edition of the 5-Year district facilities work plan as formally adopted by the School Board into the 5-Year District Facilities Work Plan.

(Note: The Town qualifies for being exempt from filing a Public Schools Facilities Element to their Comprehensive Plan.)

Policy 8.5.5: The Town hereby adopts the following Five-Year Schedule of Capital Improvements and shall update this Schedule on an annual basis

TABLE 8-1
SCHEDULE OF CAPITAL IMPROVEMENTS
FIVE-YEAR SCHEDULE OF CAPITAL IMPROVEMENTS
FISCAL YEARS 2018-2019 TO 2022-2023

Project Description	Location	FY 18/19	FY 19/20	FY 20/21	FY 21/22	FY 22/23	Total Projected Cost	Revenue Source	Consistent with other Elements
NONE									
Source: Town, 2018 and Florida Department of Transportation Five-Year Work Program, 2019-2023.									

OBJECTIVE 8.6: The Town shall remain consistent with state statutes and submit an updated Capital Improvements Element annually.

Policy 8.6.1: The Capital Improvements Element shall be updated and submitted to the state land planning agency by December 1 of each year. The Town shall convene two public hearings in October and November of each year to ensure adoption prior to December 1. The adoption of the Capital Improvement Element may occur outside of the two regular Comprehensive Plan Text Amendment cycles established by the Town.

THIS PAGE LEFT BLANK INTENTIONALLY

CHAPTER NINE

ECONOMIC ELEMENT

THIS PAGE LEFT BLANK INTENTIONALLY

Chapter Nine

Economic Element

Introduction

The County has legal and political jurisdiction over unincorporated areas; therefore, the responsibility for implementing the goals, objectives and policies set forth below by the Town can extend only to the limits of its municipal jurisdiction, except as provided by joint agreements presently in effect or subsequently adopted. Goals, objectives and policies contained in this element for the Comprehensive Plan for the Town are advisory only for areas outside the corporate limits of the town. They are not binding to the County, except as may be provided by interlocal agreements presently in effect or subsequently adopted. Several objectives and policies set forth below will be implemented through the Land Development Regulations.

Aspects of Economic Development

There are many aspects of economic development as set forth in this Chapter: job creation and retention; workforce training; tax-base enhancement; increase property values; economic diversity to promote stability; and maintaining and improving the quality of life. The Town shall request a student intern from one of the state universities to perform an analysis of the strengths and weaknesses of the Town that impact future development. In addition, the Town shall maintain regular contact through designated liaison personnel with county, regional, state and federal agencies in order to provide comment on issues affecting the economic and ecologic environment of the Town.

GOAL 9: THE TOWN SEEKS TO IMPROVE AND EXPAND ECONOMIC CONDITIONS AND OPPORTUNITIES FOR ITS CITIZENS AND TO STRENGTHEN ITS TAX BASE. THUS, THE TOWN INTENDS TO PROMOTE VARIOUS FORMS OF COMMERCIAL, INDUSTRIAL AND INSTITUTIONAL DEVELOPMENT WHICH CREATE NEW JOBS, INCREASE WAGE LEVELS AND GENERATE REVENUE. THE TOWN SEEKS TO STIMULATE AND FACILITATE THE DEVELOPMENT OF AQUACULTURE, ECO-TOURISM, SOFTWARE DEVELOPMENT, LIGHT INDUSTRY, AND OTHER COMMERCIAL ACTIVITIES, WHICH ARE CONSISTENT WITH OTHER ELEMENTS OF THE COMPREHENSIVE PLAN. THE TOWN ALSO SEEKS TO FOSTER THE RETENTION AND GROWTH OF EXISTING BUSINESSES.

OBJECTIVE 9.1: Diversified and Stable Economy. The Town will create a desirable business environment designed to attract, retain, and grow a diversified business base, so that the Town is not too dependent on any one business that may be subject to extreme fluctuation in the business cycle, e.g., tourism.

OBJECTIVE 9.2: Make Known the Benefits of the Town. The Town shall promote public and private sector partnerships that fortify markets and expand the Town's presence in the Nature Coast region.

Policy 9.2.1: The Town shall continue to support the regional economy and utilize the strength of the Nature Coast brand. The Town shall increase its presence in the region by promoting its own unique image and identity.

Policy 9.2.2: In partnership with the business community, Chamber of Commerce, Nature Coast Business Development Council, the Florida High Tech Corridor, and Enterprise Florida, Inc., the Town will initiate and maintain a marketing program that enhances the Town's image as an eco-tourism destination that is friendly to clean, environmentally sensitive businesses, e.g., software development.

OBJECTIVE 9.3 – Retain and Expand the Business Community. The Town shall identify incentive and assistance programs designed to encourage the retention and expansion of the current business base.

Policy 9.3.1: To every extent possible, the Town will ensure that programs, assistance, and incentives which are available to new businesses will be made available to existing businesses as well.

Policy 9.3.2: The Town will develop an inventory of business assistance programs, based on the Florida High Tech Corridor model developed by Volusia County, that may be appropriate for new and existing businesses

OBJECTIVE 9.4 – Recruit New Business and Industry. The Town will recruit businesses which will enhance the tax base and provide new jobs from resources outside the Town, e.g. a software development company with national sales. The recruitment program must be closely tied to the marketing program to make the Town better known. One of the top areas of concern for relocation agents is the quality of life. In addition, the cost of doing business, the infrastructure, and the qualifications of the workforce are key indicators.

OBJECTIVE 9.5 –Ensure Necessary Infrastructure to Facilitate Economic Prosperity. The Town shall initiate measures to implement infrastructure objectives and policies that protect the river and coastal waters.

Policy 9.5.1: The Town may apply for Community Redevelopment Agency status. Community redevelopment is the activity a community takes to eliminate and prevent deteriorating areas. The Community Redevelopment Agency is designed to carry out redevelopment in a defined area, e.g. Route 19. The advantage of a Community Redevelopment Agency is the establishment of tax increment financing, which allows the Town to establish a redevelopment trust fund for the Community Redevelopment Agency area. As the predefined Community Redevelopment Agency area improves and property value increases, 95 percent of the increase in tax revenue will be placed in the redevelopment trust fund to be spent within the Community Redevelopment Agency defined area.

Policy 9.5.2: The Town will seek grants to enhance the infrastructure and the quality of life of the Town including technology and communications upgrades such as wireless and wi-fi technologies.

Policy 9.5.3: Effective with adoption of this plan element, land use decisions shall assess the impact of development on the Town's principal industries, including fisheries, tourism and real estate values and shall include an estimate of the impact on property tax revenue for a proposed development, as well as the expected cost in infrastructure improvements provided by the Town.

Policy 9.5.4: The Town shall periodically update an analysis of the infrastructure strengths and weaknesses that may impact the Town's economic development and quality of life. In furtherance of this objective, the Town's capital improvements plan shall be regularly updated to include funding for infrastructure improvements through grant and loan funds as required, including individual, joint or several applications for funding to appropriate funding agencies

Policy 9.5.5: A set of criteria shall be established to maximize and selectively secure funding applicable to needed projects reflected in the Comprehensive Plan.

OBJECTIVE 9.6 – Workforce Development. The Town recognizes the crucial role an educated and trained workforce plays in the retention and recruitment of business and industry. Therefore, in partnership with public and private enterprise, the Town will endeavor to bring educational opportunities to the residents of the Town.

Policy 9.6.1: The Town will specifically partner with the County to provide Graduate Equivalent Degree classes in the Community Center.

Policy 9.6.2: As appropriate, the Town will attempt to bring community college and other training courses to the residents.

Policy 9.6.3: The Town will attempt to decrease the outward migration of our local workforce.

OBJECTIVE 9.7: – Support Tourism. The Town shall actively promote itself as a destination for tourism activities in the Nature Coast and in Florida, especially in partnership with other local (Yankeetown) and regional (the County) organizations.

Policy 9.7.1: The Town's goal is to acquire and develop a significant riverfront property as a recreational and tourist attraction.

Policy 9.7.2: The Town will give special emphasis to eco-tourism.

Policy 9.7.3: The Town shall look for a designated revenue source to promote tourism and economic development on a continuing basis, e.g. room tax, gas tax, etc.

Policy 9.7.4: The Town shall engage the services of a grant writer to procure government grants to financially assist in the development, redevelopment, purchase and funding of a wide variety of community programs and projects.

PROPERTY RIGHTS ELEMENT

THIS PAGE LEFT BLANK INTENTIONALLY

Chapter Ten

Property Rights Element

Introduction

The following goal, objective and policies constitute the Property Rights Element, in accordance with the legislative intent expressed in Section 163.3161(10), Florida Statutes, as amended, and Section 187.101(3), Florida Statutes, as amended.

PROPERTY RIGHTS GOAL, OBJECTIVE AND POLICIES

GOAL 10 - RECOGNIZE AND RESPECT JUDICIALLY ACKNOWLEDGED AND CONSTITUTIONALLY PROTECTED PRIVATE PROPERTY RIGHTS.

- OBJECTIVE 10.1** In local decision making, the Town shall consider the statement of rights as enumerated in Policy 10.1.1, Policy 10.1.2, Policy 10.1.3, and Policy 10.1.4.
- Policy 10.1.1** In local decision making, the Town shall consider the right of a property owner to physically possess and control his or her interests in the property, including easements, leases, or mineral rights.
- Policy 10.1.2** In local decision making, the Town shall consider the right of a property owner to use, maintain, develop and improve his or her property for personal use or for the use of any other person, subject to state law and local ordinances.
- Policy 10.1.3** In local decision making, the Town shall consider the right of the property owner to privacy and to exclude others from the property to protect the owner's possessions and property.
- Policy 10.1.4** In local decision making, the Town shall consider the right of a property owner to dispose of his or her property through sale or gift.

PUBLIC PARTICIPATION, MONITORING AND EVALUATION PUBLIC PARTICIPATION

THIS PAGE LEFT BLANK INTENTIONALLY

Chapter Eleven

Public Participation, Monitoring and Evaluation

Public Participation

Florida statutory law requires public participation in the comprehensive planning process. Section 163.3181, Florida Statutes, as amended, states that a governing body, and the local planning agency, shall adopt procedures to provide for and encourage public participation in the planning process, including consideration of amendments to the comprehensive plan.

Public Participation Policies

The Town Commission adopts the following procedures to provide for and encourage public participation in the planning process:

- a. All plan and plan amendment preparation, modification, and adoption shall be advertised in accordance with Florida Statutes, Chapter 163, Part II.
- b. The Town shall update the Comprehensive Plan or parts thereof as often as is deemed necessary by the Town Commission and in accordance with Florida Statutes, Chapter 163, Part II.
- c. The Town shall utilize its Planning Commission as a public forum for citizen participation and to keep the general public informed.
- d. Written comments from the public regarding planning issues shall be encouraged and entered into the public record.
- e. The Town shall provide written responses to said citizen inquiries upon request.

Summaries of the Town's Comprehensive Plan are available from the Clerk's office at Town Hall.

Monitoring and Evaluation

It is the purpose of this section to ensure the continuation of evaluation and appraisal efforts, and to set forth those actions which will be adopted as a part of this plan which will measure future and ongoing monitoring and evaluation.

Monitoring and Evaluation Policies

The Town Commission adopts the following policies for comprehensive plan monitoring:

- a. Citizen Participation: Each year, both the Planning Commission and the Town Commission shall conduct one or more public hearings on the comprehensive plan. Each such hearing shall be advertised as was described in the preceding section on Public Participation Policies.
- b. Updating Baseline Data and Measurable Objectives: The Planning Commission shall, with assistance from Town Staff, prepare updated baseline data and measurable objectives as needed. The data will then be reviewed by the Planning Commission which shall provide recommendations to the Town Commission where appropriate.
- c. Accomplishments in the Initial Planning Period: The Planning Commission will, with the assistance from the Town Staff develop a Comprehensive Plan Assessment Report (draft), which at a minimum will assess the degree to which selected goals, objectives and policies from each element have been reached.
- d. Obstacles or Problems: As a part of the above referenced report, the Community Development Director will identify obstacles or problems (including changed conditions) which resulted in underachievement.
- e. New or Modified Goals, Objectives or Policies: The Planning Commission will, with the assistance of the Town Staff and with referral to the Assessment Report or subsequent Evaluation and Appraisal Report, recommend new or revised goals, objectives or policies needed in response to discovered problems.
- f. Assured, Continued Monitoring and Evaluation: The yearly public hearings, the annual updating of the Capital Improvements Element, and the involvement of the Town Staff are some methods by which the Town has assured that monitoring and evaluation will be continuous. In addition, it is the adopted policy of the Town of Inglis to assign to the Planning Commission the responsibility for ongoing and future monitoring and evaluation of this comprehensive plan.
